THE LIVE-FOREVER ROSE. IT BLOOMS FIRST AND EVERY YEAR.

A bug-proof, hardy rose at 10 to 20 cents each. If you have tried growing roses and failed, try once more, for we have discovered a rose which lives long and is proof against insects and diseases. It is as easy to grow this variety as lilacs, corn or sunflowers.

Live-Forever Rose is so rapid in growth and of such healthy foliage, it is proof against all enemies. It needs no spraying. This is an old rose newly discovered, described by Pliny, the historian, who lived when Pompeii was destroyed by the volcano Vesuvius. It was the national rose of the Roman Empire, known as the Hundred Leaf Rose. In the Roman world. To others it is known as the Many Flowering Rose. No rose on earth produces large double flowers more profusely than the Live-Forever. When it first blossoms it is a deep pink. At the end of two weeks the roses have turned white. This variety is remarkably fragrant. A bed of them will scent a whole yard.

I recommend this rose to all, especially to those who have not been able to succeed with roses. Plant it in large beds and you will have a display of bloom that will attract attention and admiration. Plant it in the form of a hedge-row and you will have something attractive and unique. You can train it low or high as you desire. Live-Forever Rose can be trained as a climbing or as a bedding rose, or it can be trained to a single stalk like a rose tree.

Price of Live-Forever Rose: Strong, well rooted 2 year bushes, 20c. each, 12 for $2.00, 50 for $7.50. Price of 1 year bushes, or mailing size, suitable for hedges, etc., 10c. each, $1.00 per 12, 50 for $4.00, 100 for $7.50. For list of other roses see pages 54, 55.
**HOW TO ORDER.** — We employ no agents. This Catalogue is our only salesman. Fill out this Order Sheet with the items you want to buy, enclosing Postal Money Order, or Bank Draft on New York, and mail all to us in enclosed envelope. By this method you save half the money you would have to pay agents for trees. We have filled orders in this way for twenty years, and are well known all through the country. You can learn of our responsibility through any commercial agency, bank or banker, or of the postmaster at Rochester, N. Y. We pack and ship all Winter to Southern States from trees stored in our large cellars. Our Regular Spring Shipping Season opens from April first. **State positively** how we are to ship, whether by Freight, Express, or Mail. If by Freight or Express, give name of R. R. station and your post-office.

DON'T MISTAKE. This is the order sheet to use when you desire plants, etc., by Mail. (See last page for list.) If you desire plants and trees by Express or Freight, see other side.

GREEN'S NURSERY CO., Rochester, N. Y.
GREEN'S HARDY BLACKBERRY.

Wonders never cease. At Green’s fruit farm there is a large piece of timberland and near it a clump of cedars. It is here that we discovered, in grass and weeds, thirteen years ago, a wild blackberry bush which was producing very large berries abundantly. We found its quality superior, its core being tender and sweet, therefore we dug up a plant and transplanted it with great care. For thirteen years we have been fruiting this valuable new blackberry and offer it now for the first time. While we have introduced many new fruits that have proven of great value throughout the country, this is the first new fruit introduced by us which had its birthplace on Green’s fruit farm. The plant is remarkably vigorous and enormously productive of large sweet berries with no hard core. This a variety which will delight our patrons. We know of no more tempting plant to have in the home garden. A dozen plants will furnish berries for a family if the ground is well enriched and well mulched. I have just picked four quarts from six plants not long planted.

Price of plants of Green’s New Hardy Blackberry: $1.00 per 12, 6 for 50c. by mail or express.

GREEN'S NURSERY CO., Rochester, N. Y.—Am well pleased with the trees and the careful way in which they are packed. Thanking you for the generous way in which you have treated me. MRS. V. P., Hyde Park, N. Y.

GREEN'S NURSERY CO., Rochester, N. Y.—The box of trees came to hand safely. They are the finest lot of trees and shrubs I ever set out. J. G. S., Wolfville, Can.
This is the way I Order Plants, Trees and Vines.

I send to Green's Nursery Co., Rochester, N. Y., for their illustrated catalogue which describes the various varieties of fruit and ornamental trees, vines and plants, and gives prices after the description of each variety. In that catalogue I find an order sheet on which I make out a list of the trees, plants, etc., which I desire to plant, attaching prices to it. Then I procure a postal money order, express money order, bank draft, or I enclose money in the letter, and register it and forward the order, money and my letter in an addressed envelope which I find in Green's catalogue. This is an easy way and a desirable way to order trees, plants and vines. This is the kind of business that Green's Nursery Co. has done during the past twenty-five years. Many hundreds of thousands of dollars have in this way been sent to Green's Nursery Co. and the orders have been faithfully filled, as is seen by the fact that such orders are constantly increasing. Every new year brings more orders than the past. Green's Nursery Co. is incorporated under the laws of New York State, with a paid-up capital of $100,000. Any Bank can tell you in a moment about our responsibility and financial standing, by consulting Dun's or Bradstreet's Commercial Reports.

Give Plain Shipping Directions.

State positively when ordering how we are to ship, whether by Freight, Express, or Mail. If by Freight or Express, give name of R. R. Station and your Postoffice too. If by Mail, your Postoffice only. Do not forget postage. If you desire shipped by a special route, specify this also.

In Writing Us,

Always give name, postoffice, county and state, with full particulars, and reference to previous correspondence, or orders, if any. Scores write us every season forgetting to do this. Please don't forget this! Some forget to sign their names or give postoffice or state. Make all orders plain.
This size Green's First Class Trees 2 to 3 years. 5 feet high.
This size Green's Extra Size Trees, 6 feet and up, 2 to 3 years.

### IMPORTANT.

Orders for trees, etc., to go by express, should not be for less than $1.00 worth. Orders to go by freight should not be for less than $2.50. If your order is less than $1.00, see mail order pages.

Northport, L. I., April 25, 1904. Green's Nursery Co.: The stock ordered from you arrived last week in fine shape, and I wish to express to you my appreciation of the same. The trees are all doing nicely and look thrifty and hardy, and I am very much pleased with them. I can most certainly heartily recommend your stock to anybody, and shall take pleasure in doing so in this part of the country, for whatever I have purchased from you has always reached me in good condition and proved to be good stock. Thanking you for your kindness in sending me the extra stock, I remain, yours very truly,

M. C. R.
We are the Oldest Nursery Firm in the World Receiving Orders Entirely Through the Mails.

OUR CHARLES A. GREEN originated this method of doing business in a large way in 1874. We are the best equipped of all nurseries for the mail order trade. We are incorporated under New York State law, with $100,000 capital, fully paid. We have the largest buildings and storage cellars and more land devoted to the growing of trees than any other exclusively mail order nursery in the world. We have 150,000 customers scattered over every state and territory. Where once we had only one patron in a village or township, now we have large numbers. Our pleased patrons have thus extended our business.

Since we grow our own trees, we can be sure that they are vigorous, healthy and true to name.

Our financial standing is quoted in Dun's and Bradstreet's commercial reports, which can be seen in every bank or large business house throughout the country. We have permission to refer you to the Traders' National Bank, Rochester, N. Y., in regard to our financial standing. Our general terms are cash with order. We make no charge for packing or boxing at prices offered in our catalogue. We charge for boxing wholesale and specially priced orders.

PLANT BETTER TREES AND SAVE HALF OF YOUR MONEY

If you buy of tree agents or peddlers more than half the money you pay them goes to the agent himself, for his wages and expenses. This you save by buying direct of us, the producer. If you wish to find the agent who sold to you, you cannot do so, but you can always find us at Rochester, N. Y., where we have been growing trees for 25 years past.

There is a difference between wholesale and retail prices of trees. We are selling trees to planters at nearly wholesale prices. How can we do this? We can do it for the reason that we do not have to pay salaries to tree agents and tree peddlers to canvass the entire country. We have no tree agents. Our catalogue is our only salesman. Those nurserymen who sell through tree agents spend half the money they get for the sale of trees in paying agents and agents' expenses.

We sell better trees than most nurserymen. We have 245 acres devoted to growing trees, plants and vines. We handle our trees with great care and pack them carefully, so that they arrive in the finest possible condition.

Our Trees, Plants and Vines are of Our Own Growing.

We sell various sizes of trees. Those who live far away order small size trees at lower prices, since the freight and express charges are less on them than on larger trees. Small trees are carefully sorted and are in fine condition, and are sold much cheaper than the larger size.
GREEN'S HOME GARDEN COLLECTION.

39 FRUIT AND ORNAMENTAL TREES AND PLANTS FOR $4.48.

Our Mr. C. A. Green is often asked by his patrons to make a selection of fruit for the home garden. Below he offers a valuable collection to introduce our trees, plants and vines into new sections.

REGULAR CATALOGUE PRICE, $5.50; SPECIAL BARGAIN PRICE, $4.48.

3 APPLES TREES.
1 Fanny,
1 Banana,
1 C. A. Green Selection.

3 PEARS, STANDARD TREES.
1 Bartlett,
1 Bosc,
1 C. A. Green Selection.

1 each of 3 varieties for the three seasons,
C. A. Green's Selection.

2 CHERRY TREES.
1 Early Richmond,
1 Montmorency.

2 PEACH TREES.
1 Elberta,
1 C. A. Green Selection.

2 PLUM TREES.
1 Japan Plum,
1 Thanksgiving Prune.

2 GRAPEVINES.
1 C. A. Green's New White,
1 Concord.

2 GOOSEBERRY BUSHES.
1 Industry, 1 Downing.
12 Cuthbert Red Raspberry Bushes,
6 Red Cross Currant Plants,
1 Russian Mulberry Tree,
1 Live-Forever Rose, 2 years old.

All trees and plants offered in above collection are strictly first-class, large size, packed free on board cars at Rochester, N. Y. 39 TREES AND PLANTS FOR ONLY $4.48. Regular catalogue price, $5.50.

GREEN'S CERTIFICATE, WORTH $1.00

If sent in with order on or before March 15th.
(WRITE YOUR NAME AND ADDRESS PLAINLY HERE).

Name__________________________
Postoffice_______________________State______________

THIS CERTIFICATE (when accompanied by a cash payment for $1.00 worth or more of trees) entitles the holder to a credit of One Dollar on his purchase of trees, plants or vines, but the prices must be those printed in Green's Catalogue, and no plant, vine or tree, of Green's Home Garden Collection, premium or gift, must go with this offer.

This Certificate will not be accepted after March 15, 1906. GREEN'S NURSERY CO.
Rochester, N. Y.
YELLOW TRANSPARENT APPLES.

If you want the best and most productive yellow summer apple, plant Yellow Transparent. It has succeeded well at Green's fruit farm, where it has borne fruit in the nursery rows and on orchard trees the second year planted. It is something like Early Harvest in appearance. It is a stronger, more upright grower and as great a bearer. The famous Dr. Hoskins, of Vermont, was in love with Yellow Transparent as the dairy man may be in love with his best milch cow. He had a photograph taken of an orchard tree, laden with fine specimens, borne two years after planting. None but hardy trees can be grown in Vermont, where this succeeded so well, but now it has been tested in almost every state in the Union and has been found hardy, productive, vigorous and desirable in every way. It is called Yellow Transparent because it has the transparency of the purest wax. The specimens are free from defects and will keep a long time for a summer apple. Its quality is superior and this, with its great beauty and wonderful productiveness, makes it a favorite summer apple the world over.

Price of Yellow Transparent: First-class trees, 2 to 3 years, 5 feet high, 15c. each, $2.00 per 12, $15.00 per 100. Extra size, 6 feet high, 20c each, $2.25 per 12, $18.00 per 100.

Russian Mulberry is the hardiest of all mulberries, a profitable tree to plant in your chicken yards.

Live For-ever Rose.—We are making a specialty of this rose, it blooms the first year planted. See first inside cover page for description.
SUMMER APPLES.

Sweet Bough.—Large, light yellow, tender, sweet and excellent for baking. Of compact, moderate growth, producing large crops annually and is a profitable market sort. August.

Red Astrachan Apple.—This hardy early variety is well known, and a lengthy description is not necessary. Its merits are conceded in nearly every state in this country. Always demands a ready sale at paying prices, if grown for market, and is indispensable for home use. Large, roundish, nearly covered with deep crimson, overspread with a thick bloom; handsome.

Duchess of Oldenburg (Red Fall Apple.)—A man near Rochester, N. Y., planted 5000 apple trees that were supposed to be Banana, a winter variety, but which, when they came to fruit, proved to be Duchess of Oldenburg. He was about to sue the rascally nurseryman who thus imposed upon him, but that year his orchard bore an immense crop of fruit, which sold at remarkably high prices, and he concluded that it was the most fortunate thing that ever occurred to him that his trees were all of the Duchess. This happened many years ago, but the orchard has continued to be one of the most profitable orchards in the country, and has yielded its owner a liberal fortune. This orchard of Duchess apples has borne fruit every year for many years. The owner picks the fruit very early and ships it to New York and Boston, where it sells at high prices. Duchess is a large, beautiful Russian apple; roundish; streaked red and yellow; tender, juicy, pleasant; a kitchen apple of best quality, and esteemed by many for dessert. Tree a vigorous, fine grower, and an early and abundant bearer. September. Succeeds well in the Northwest, where most varieties fail. The hardest valuable fall apple. In Minnesota and Wisconsin horticultural reports recently published we find Duchess the most valuable commercial variety, free from blight, a sure cropper, hardy as an oak, having survived in some instances when all others died (except Wealthy), and all in all a wonderful variety for those states. It is termed a summer variety in some parts. It keeps long and is both a summer and fall variety. Very hardy.

Price of all varieties on this page: First-class trees, 2 to 3 years, 5 feet high, 18c. each, $2.00 per 12, $15.00 per 100. Extra size, 6 feet high, 20c. each, $2.25 per 12, $18.00 per 100.

Save $100 to $200 in buying trees of us for your orchard. We grow the trees and sell them ourselves. They go direct from our nursery to your home. We do not employ any agents or salesmen. When you buy Green's trees you pay the actual cost of growing and our small profit. This profit is small because we sell millions of trees yearly. A tree agent may only sell 100 trees where we sell car loads, and he must charge extravagant prices to meet his expenses. Then he has to buy his trees, whereas we grow our trees, thus we know our trees to be true to name.
PLATE OF FANNY APPLES.—From Photo.

Fanny—(Late Summer Apple). Charles Downing's favorite apple. If you fail to plant trees of the Fanny you will make the mistake of your life. It is the handsomest fruit of its season in the world, and there is no apple of its season that compares with it in fine quality. It is among the best and its fragrance will fill a room like the fragrance of a basket of roses. This apple is rare, being seldom found in any catalogue. We have taken great pains to have it true to name. When you plant trees of Fanny remember you have one of the finest apples in the world, and one of the rarest, since it is seldom found in any nursery or orchard. The handsomest of all the late summer or early fall varieties, and the finest in quality. Also beautiful in form and of good size. Fanny was recommended to me by the great and lamented Charles Downing, who sent me specimens which delighted me beyond expression. He pronounced it the queen of apples. It is of a dark, rich crimson color, firm, juicy, agreeable sub-acid. The tree is vigorous grower and productive; originated in Pennsylvania. Very desirable as a dessert fruit. We predict for it a great future. J. S. Gaylord, Kan., writes: "My Fanny trees are healthy, thrifty, grow well in orchard, produce good crops of fine apples. Bore when we had no other good fruit."

Price of Fanny: First-class trees, 2 to 3 years, 5 feet high, 15c. each, $1.50 per 12, $12.00 per 100. Extra size, 6 feet high, 18c. each, $2.00 per 12, $15.00 per 100.

Winesap.—Season, winter. Size, medium; color, bright red; flesh yellowish, firm, crisp, sub-acid. This is a hardy apple. Widely cultivated throughout the Western and Middle states.

Fameuse (Snow Apple).—Hardy; medium size; deep crimson; flesh is snowy white, tender, melting and delicious. Tree vigorous with dark wood; one of the finest dessert fruits and valuable for market. November to January.

Hurlbut—Medium size, yellow, shaded with red; flesh white, crisp and tender, juicy, mild sub-acid; quality excellent; very hardy and suited to the extreme north.

Fallawater.—A large, roundish, slightly ovate conical, very regular and smooth, skin yellowish green with dull red cheek; flesh greenish white, fine grained, with a mild, slightly sub-acid flavor. Tree a strong grower and good bearer.

Price of Winesap, Fameuse, Hurlbut and Fallawater: First-class trees, 2 to 3 years, 5 feet high, 18c. each, $2.00 per 12, $15.00 per 100. Extra size, 6 feet high, 20c. each, $2.25 per 12, $18.00 per 100.
WINTER APPLES.

Yellow Bellflower.—Season, winter. Hardy, large size, beautiful golden color, often with red blush, conical in shape. Flesh very tender and fine grained, crisp, juicy, sub-acid; of excellent quality.

Grimes (Grimes' Golden).—Of all the apples in cultivation there is none that quite equals it in satisfying and delicious quality. It is only medium in size; roundish, truncated in shape; green when ready to gather, but turns rich golden yellow and sometimes a little blushed; flesh firm, becoming tender and breaking, juicy, rich, sub-acid, aromatic, satisfying; of highest quality, says H. E. VanDeman. Trees very productive.

McIntosh Red.—Season early winter. A very hardy variety, originating in Ontario, Canada. Size medium to large with yellow skin entirely covered with bright red. Is of fine flavor, juicy, sub-acid. A seedling of Fameuse.

Minkler.—A new red winter apple; a long keeper of good quality. Fruit medium, roundish, obleate, slightly conical, pale greenish yellow, striped and splashed with two shades of red, flesh yellowish, compact, moderately juicy, mild, pleasant sub-acid, vigorous; season, January to April.

Maiden's Blush Apple.—This is one of the handsomest and most highly prized of all the fall apples. It is a hardy and very productive variety, succeeding not only in the Eastern States but throughout many of the Western States. It is of superior quality, flesh being tender and of fine flavor. The fruit is uniformly fair and attractive. It has a red cheek on a clean yellow skin. Its season is September and October. It makes a beautiful tree and is a good grower.

We know of no better opportunity of making money than to plant rows of apple trees along the roadside, or along the line fences, and yet the trees will do even better if planted in regular orchard form and the ground kept well cultivated.

C. A. Green.

Price of all varieties of Apples on this page: First-class, 2 to 3 years, 5 feet high, 18c. each, $2.00 per 12, $15.00 per 100. Extra size, 6 feet high, 20c. each, $2.25 per 12, $18.00 per 100.

Jonathan Apple.—Very hardy. Jonathan originated in Woodstock, N. Y., and was exhibited as early as 1829, and sometimes called the New Spitzenberg. Does well in many of the Western States and in the mountain orchards on the Pacific Coast. The apple is a clear, whitish yellow, thickly covered with clear red stripe stripes; of medium size, but very handsome, and one of the best in eating quality.

Shiawassee Beauty.—Hardy, and of finest quality. A favorite of Prof. A. J. Cook. Well spoken of by many. Hardy and vigorous. "Every family should have one." Medium in size; whitish, splashed and striped with rich red. Its flavor is delicious. Season, October to January.

Roxbury Russet.—Medium to large. Surface rough, greenish covered with russet. Tree free grower, spreading; a great bearer. Keeps until June. Its great popularity is its productivity and long keeping.

Ontario.—Hardy, fine, thrifty grower, very productive. Handsome, large size, yellow, nearly covered with bright red; juicy, sub-acid, valuable for market and home use.
BANANA APPLE—Better than Swaar in Quality.

Banana Apple.—A friend told me yesterday that he planted Banana apple trees three years ago and that these trees bore fruit last fall. This indicates that the Banana is an early fruiting variety. I am at this date, February 8th, eating Banana apples and have been for several weeks. I have my apples stored in bushel boxes in a cold storage building, and take them out only as I want to eat them. I carried several of the Banana apples to the Western New York horticultural meeting, giving several of the members an opportunity to test its quality. Many spoke of its pronounced banana flavor; after eating a mouthful of this apple you have the sensation of having eaten bananas for half an hour. Prof. VanDeman says he considers the quality of Banana better than Swaar. Ordinarily Banana is a bright golden yellow apple. We have been growing Banana apple at Green’s fruit farm for many years. The tree is a good grower. No orchardist should feel satisfied without having the Banana in his orchard.

C. A. GREEN.

Price of Banana Apple trees: Medium size, 20c. each, $2.00 per 12, $15.00 per 100. Large size, 25c. each, $2.50 per 12, $18.00 per 100.
Winter Banana Apple.—I claim that this apple is of better quality than the Swaar, and this makes it the best of all apples that exist on the earth, in quality. In February I went into my cellar and found the Banana apples of a color of burnished gold, the handsomest apples I ever saw. There were no culls among them, one was as handsome and as perfect as another.

The name is most appropriate as it has a delightful banana perfume.

**Price of Banana:** First-class trees, 2 to 3 years, 5 feet high, 15c. each, $2.00 per 12, $15.00 per 100. Extra size, 6 feet high, 20c. each, $2.25 per 12, $18.00 per 100.

Bismarck is a new apple attracting considerable attention. It is an attractive apple in color and shape, the skin being a bright yellow covered on one side with bright carmine. The principal feature of the Bismarck which recommends it to many people is that it bears fruit at a very early age on small trees.

"On a transplanted two-year old standard tree were counted 26 handsome apples. The usually guarded "Gardener's Chronicle," of London, said last fall that 18½ rods were covered with Bismarck trees, two years old, on Doucin stock. They were planted in nursery rows about three feet apart, the plants about a foot apart. Many of them had 11, a few 12, large fruits upon them. The fruit is said to be of large size, specimens having been grown weighing nearly two pounds each. The color is described as of a deep orange yellow shading to red. The flesh is yellow, tender, juicy and of good quality. The claim is made that it keeps all winter."

**Price of Bismarck Apple Trees:** 4 to 5 feet high, 2 years, 35c. each, $3.50 per 12. 3 to 4 feet high, 30c. each, $3.25 per 12.
Baldwin (Red Winter Apple.)—What the Bartlett pear is to pears, the Baldwin is to apples for the Eastern and Middle states. While sufficiently hardy for these sections, it will not endure the severe climate of the Northwest. In Western New York the advice used to be in planting a thousand trees plant nine hundred and ninety-nine Baldwins, and plant the other tree a Baldwin also. While this would be too large a planting of one variety, it shows the high esteem in which this apple is held as a market fruit. No variety yields larger crops or bears shipment better, or is more attractive in color and size and shape, than the Baldwin. It is esteemed as an eating apple, and for cooking. Thousands of barrels of this fruit are exported to England annually. For a commercial orchard it can be relied upon. Large, bright red, crisp, juicy, and rich; tree vigorous, upright, and productive. In New England, New York, Ontario, and Michigan, this is one of the most popular and profitable sorts for table or market. Price of Baldwin: First-class trees, 2 to 3 years, five feet high, 18c. each, $2.00 per 12, $15.00 per 100. Extra size, 6 feet high, 20c. each, $2.25 per 12, $18.00 per 100.

A FAC-SIMILE OF MEDAL AWARDED TO
GREEN'S NURSERY CO.
ROCHESTER, N.Y.
By the Pan-American Exposition for a superior exhibit of Corsican Strawberries and Red Cross Currants.
The Pan-American also conferred a diploma to Green's Nursery Co., setting forth the fact that the award had been made for such an exhibit, on the recommendation of a superior jury.
Rhode Island Greening.—This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than perhaps any other variety. It is a good keeper, but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and is a most abundant yielder, producing immense crops. The fruit is invariably of large size, and is free from defects. We have trees at our nursery farm sixty years old that are healthy, vigorous, and productive. There is no apple known that will make better pies or sauce than the R. I. Greening, therefore there is no apple more highly prized by the housewife. Notice that there is a vast difference in the cooking qualities of different apples. I have seen apple pies wherein the apple would not cook soft, the pieces being left hard after long cooking. But the Greening cooks soft and is famous everywhere for its pie making qualities. The Greening succeeds admirably throughout the middle states, and almost everywhere except in extreme north where only such hardy varieties as North Western Greening, Yellow Transparent, and Duchess of Oldenburg will succeed. It is an enormous bearer, and bears regularly every year.

A Rochester man has sold the apples from twenty-eight acres of orchards at $3.00 per barrel, and he estimates that he will have 7000 barrels, which will make the yield $21,000.00, a little less than $1000 per acre. This man has learned to grow fine fruit. You can learn to grow fine fruit also. Why not plant an apple orchard?

Bargain Price of R. I. Greening trees: First-class trees, 2 to 3 years, 5 feet high, 10c. each, $1.50 per 12, $9.00 per 100. Extra size, 6 feet high, 15c. each, $1.50 per 12, $12.00 per 100.

Garden Royal Apple.—This is a high class dessert apple of great value. I have long been trying to get scions of this rare but valuable variety, and feel confident that those who appreciate a superior quality of fruit will be delighted with Garden Royal. It is a reddish apple on yellow ground, somewhat redder than Baldwin. The flesh is yellowish white, exceedingly tender and fine grain, mild, and sub-acid.

Price of Garden Royal: First-class trees, large size, 25c., $2.50 per 12. Medium size, 20c., $2.25 per 12.

Sutton Beauty.—C. A. Green has always been loud in praise of this beautiful winter apple, which he is growing largely. It is a rare variety seldom found in the catalogues, and on account of its great beauty, productiveness and quality, should be found in every collection. Medium to large, roundish; waxen yellow striped with deep carmine; flesh white, sub-acid; tender, juicy, good. A long keeper.

Price of Sutton Beauty: First-class trees, 2 to 3 years, 5 feet high, 18c. each, $2.00 per 12. Extra size, 6 feet high, 20c. each, $2.25 per 12.
King (King of Tompkins Co.)—A red winter apple. When you see in the market apples of extraordinary size, beautiful red in color, specimens that attract the attention of everybody who passes by, you may know that these are the King apple, an appropriate name since it is of the largest size and possessed of the greatest beauty. The market is never fully supplied with this variety, since its size and beauty make it in great demand. A superb red apple of the largest size and finest quality. The King succeeds well in Western New York, and on account of its color and firmness is one of the most desirable for distant shipping. It is also highly attractive, and is always in great demand in the market. Last year dealers were looking everywhere for Kings. Do not fail to plant King Apple.

Prices of all varieties of Apple Trees offered on this page: First-class trees, 2 to 3 years, 5 feet high, 18c. each, $2.00 per 12, $15.00 per 100. Extra size, 6 feet high, 20c. each, $2.25 per 12, $18.00 per 100.

Hubbardston (Hubbardston Nonesuch).—Large; striped yellow and red; tender, juicy and fine; strong; good bearer. November to May. The Hubbardston has long been a popular early winter apple, often growing to the largest size, and always of good size. It is a handsome red apple, far superior in quality to many varieties. Hubbardston has become more popular recently than ever before, since it has been discovered that its leaves have great power to resist attacks of the apple scab fungus.

York Imperial Apple.—Prof. Van Deman recommends it. This fine, hardy, large, red winter apple has rapidly leaped into favor of late, and on account of its beauty has been in demand for shipment to Europe. Prof. Van-Deman and other experts are loud in its praise. It succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The foliage and fruit are remarkably free from scab. The fruit is of medium size, oblong, angular, oblique, smooth, skin yellow and almost wholly covered with two shades of red, the darker one disposed in distinct stripes; basin deep, cavity deep and narrow; stem short; flesh yellow, juicy, firm, sub-acid, good; season, late winter. A good shipper, bringing highest prices. The American Pomological Department says: "York Imperial originated early in this century in York, Pa., and was sent out as Johnson's Fine Winter at first, but Downing gave it its present name. It has long been a leading market variety in Pennsylvania, Maryland and Virginia, and since 1880 has become a leader through the Middle Western States."

The Walker Apple is one of the new varieties that may become a very fine market sort. It was shown at the Pan-American Exposition and attracted much attention there because of its very handsome appearance. It is of good size, being a little above medium; is most brilliantly striped with red. It is of fair to good quality and seems to keep well. What it will do in the orchard in different sections is yet to be demonstrated, but the trees are said to bear well where they have been tested.
AMERICAN BLUSH.

American Blush (High Quality Red Winter Apple).—Here is an apple that is not surpassed the world over for large size, great beauty of color, or for excellent quality. It is an apple that should be growing in every garden and orchard. Fruit large, roundish; color bright red on yellow skin; flesh yellow, with a fine, rich, aromatic flavor, sub-acid. The tree is a vigorous grower, and is exceedingly productive, bearing an abundant crop of fruit every year. This is a remarkable statement, since many varieties of apples bear only every other year. The foliage of American Blush resists scab apple fungus and other diseases, being tough and leathery, as well as luxuriant, which accounts in part for the great productiveness of American Blush. Season, November to March. We secured this variety of James Norton, Farmer Village, N. Y., a friend of ours, a veteran and reliable fruit grower. He says that American Blush somewhat resembles Hubbardson, but that it is entirely distinct from Hubbardson. We have fruited this apple at our farm for several years and are convinced that Mr. Norton is correct in his statement, since American Blush proves to be a better keeper than Hubbardson. It has, however, many of the characteristics of that popular variety called Hubbardson. The flesh of the American Blush is of a crisp and tender character, juicy, aromatic, and the most tempting of all apples. Once eaten one cannot forget the peculiar delicacy and attractiveness of this highly flavored variety. Heavily streaked and splashed with bright crimson; superlative quality, hardy and productive. Not only is it attractive in appearance and flavor, but it is remarkably reliable in bearing—every year in many localities. Where other varieties have failed year after year American Blush has yielded large crops of remarkable fruit. We make a specialty of this splendid apple, because we recognize its value to our patrons. There are other good varieties, but none that will give our friends better returns for a winter fruit. As a dessert fruit, cooking fruit, for shipment to nearby markets, or for exportation to England, it will be found an excellent variety, bearing when other varieties grow no fruit.

Price of American Blush, first-class trees: 2 to 3 years, 5 feet high, 20c. each, $2.25 per 12, $19.00 per 100. Extra size, 6 feet high, 25c. each, $2.75 per 12, $22.00 per 100.

Princess Louise.—Prof. H. E. VanDeman says that this is a Canadian apple of great value. The size is medium, oblate conical, mixed and striped red over a yellowish ground color; flesh yellowish, fine, juicy, tender; sub-acid flavor; good quality. My favorite.—C. A. GREEN.

Rome Beauty Apple.—This is a large and handsome apple, almost entirely covered with bright red; an apple of high quality. The flesh is tender, juicy and highly flavored. It is a popular apple over a wide range of country, particularly in the West.

Price of Princess Louise and Rome Beauty: First-class trees, 2 to 3 years, 5 feet high, 20c. each, $2.25 per 12, $19.00 per 100. Extra size, 6 feet high, 25c. each, $2.75 per 12, $22.00 per 100.
NORTHERN SPY APPLE.

This superior red winter apple originated near Rochester, N. Y. It has no superior for beauty and quality. When at its best it is of large size, and an abundant bearer. The fruit is held on a long, slender stem, which sways in the wind, therefore the Spy does not blow off from the tree. It is a good keeping apple. Season, December to February.

Price of Spy: First-class trees, 2 to 3 years, 5 feet high, 18c. each, $2.00 per 12, $15.00 per 100. Extra size, 6 feet high, 20c. each, $2.25 per 12, $18.00 per 100.

BLENHEIM ORANGE.

Blenheim Orange (Lord Nelson).—Our C. A. Green recommends this remarkably large and handsome apple with great confidence, since it has proved for him at Green's fruit farm one of the most profitable varieties of early winter apples ever grown there. It ripens at a date when apples are in great demand, that is, before the other winter varieties are ripe enough to eat. The skin of this apple is of a golden hue almost entirely covered with stripes and slices of bright red. Its quality is delicious.

This superb apple is known as the Blenheim Pippin in Canada and Blenheim Orange in England, where it originated. It is a regular bearer of large, handsome, reddish apples of good quality, desirable for dessert or for cooking purposes. The flesh is yellow, crisp, juicy, tender, and highly flavored. Its season is early winter, being at its best in December and January, but we have kept it much later. The tree is of handsome form and a good, rapid grower.

Price of Blenheim Orange Apple Trees: Medium size, 20c. each, $2.00 per 12. Large size, 25c. each, $2.25 per 12.
Wismer's Dessert.—

Hardy. Rest of all in quality. The Dollar apple. The tree is iron-clad in hardiness. It is vigorous in growth and healthy in constitution. It bears very early, regularly, and excessively. The fruit is winter in season, and is a first-class shipper. It is of the most popular size, medium to large. It is very handsome in appearance, being smooth and most brilliantly colored. Its aroma and flavor are much superior to any other apple known. Its texture is like a pear, being extremely juicy, melting, rich, buttery and free from fibre. This cannot be said of any other apple.

Prof. John Craig says, "The quality of this apple pleases me very much. It is of a peculiarly distinct character in its melting juiciness. I know of no other apple having such a pleasant, melting character of flesh, and being so free from fibre." Prof. L. H. Bailey says: "We agree here that it is a most remarkable apple. It has the least roughness in flesh of any apple I have ever eaten, and the flavor and texture are most excellent." Col. G. B. Bracket, U. S. Pomologist, says: "It is the most desirable for dessert of all I have eaten."

Price of Wismer's Apple Trees: 2 to 3 years, 5 feet high, 30c. each, $3.50 per 12. Extra size, 6 feet high, 40c. each, $4.50 per 12.

GREEN'S IMPROVED BALDWIN APPLE.

At the rear of C. A. Green's Rochester, N. Y., dwelling stood a thirty-year-old apple tree which in every way appeared to be a Baldwin. The apples were placed in the cellar. The following March we were surprised to find them of a far brighter and better color than Baldwin. The red blush and streaks were brighter, and the yellow portions were more like gold than Baldwin. On eating these apples we found that the quality was far better than Baldwin. We cannot recall a more tender fleshed or better flavored apple. It has all the excellent qualities of the Baldwin. In quality and beauty it is far superior to Baldwin. It is a superior-strain of the Baldwin. Prof. L. H. Bailey says that trees of certain varieties bear better fruit than others, and that by grafting from these peculiar trees we may greatly improve well known varieties. This is just what we have done.

Price of Green's Improved Baldwin: First-class trees, 2 to 3 years, 5 feet high, 40c. each, $4.50 per 12. Extra size, 6 feet high, 50c. each, $5.00 per 12.

C. A. Green.
See Bargain Price of Ben Davis Apple.

Ben Davis is a hardy and attractive red apple, and succeeds wherever apples are grown. We have seen it in the far South bearing well and withstanding the extreme heat. We have seen it in Northern Michigan and Central New York, Ontario and Massachusetts where it surprised us with its size and handsome color. There is no apple in all of North America that is grown so extensively and with such general profit as Ben Davis. Say what you will of it the market men like it, and somehow the customers do too, else they would not continue to buy it. There is no apple that has more favors on account of its hardiness, productiveness, beauty and endurance in shipping. Its quality varies, owing to locality. It is supposed to have originated in Virginia and is growing in favor in many States. It is excellent for cooking. Fruit large and handsome; bears handling well and keeps until March in ordinary storage. There are better apples, but where Ben Davis succeeds one can always be sure of success owing to its regular and heavy bearing qualities.

Reduced price of Ben Davis apple trees: First-class trees, 2 to 3 years, 5 feet high, 10c. each, $1.00 per 12, $9.00 per 100. Extra size, 6 feet high, 15c. each, $1.50 per 12, $12.00 per 100.

Wealthy Apple.—This is a beautiful hardy winter apple, originating in Minnesota. It is gaining in popularity each year on account of beauty and quality, as well as its hardiness. It is productive and an acquisition almost everywhere. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. This is one of the few most desirable varieties for Minnesota, Wisconsin, Iowa, Nebraska, as well as the Eastern and Middle States. In season it differs somewhat according to locality; in New York and neighboring States its season is December to February and earlier in others.

Price of Wealthy: First-class trees, 2 to 3 years, 5 feet high, 18c. each, $2.00 per 12, $15.00 per 100. Extra size, 6 feet high, 20c. each, $2.25 per 12, $18.00 per 100.
Wagener (Red Winter Dessert Apple)—Wagener is one of the most beautiful winter apples ever grown. It is supposed to be a seedling of the Northern Spy. It is much brighter red than the Spy. It is of the highest quality, the flesh being crisp, tender and aromatic. I have known of no apple possessing greater beauty or of finer quality than the Wagener, and yet it is little known. It succeeds well East and West. All successful fruit growers desire such an apple as the Wagener, not only for their own eating, but as an attractive fruit to market at home or abroad. No orchardist’s list of varieties can be complete without this beautiful and superior flavored apple. An old schoolmate drove past my home last season with beautiful crimson apples in his wagon. It seemed to me that I had never seen such uniformly attractive and perfect specimens. “See here, where are you going with those apples?” I asked. “They are sold to a regular patron, who buys them every year. They are the Wagener, and this man says they beat the world for quality and beauty.” “Bring me four barrels when you come in next time; I cannot allow such fine fruit to pass my place unmolested.” Medium to large; deep red in the sun; flesh firm, sub-acid and excellent. Tree a vigorous, handsome, upright grower, and very productive; an excellent variety, introduced from Penn Yan, Yates county, N. Y.

Best Hardy Crab Apples.

Transcendent Crab Apple.—This is probably one of the best of all crab apples, popular over the entire country; it is perfectly hardy everywhere and an immense bearer, yielding large crops every year. It is also a rapid grower and often bears fruit three years after planting. The color of this crab apple is as bright red as the brightest red rose. As I have been driving by these trees in farmers’ yards, filled with fruit, from the distance they seemed to look like red roses. These trees were beautiful objects when thus laden with bright red apples. The fruit of this crab is held in great esteem by housewives for making jelly, pickles and preserves. They can be dried, cooked, canned, or preserved with the skin on, saving a great amount of trouble. It is especially valuable for cider.

Price of all varieties of apple trees on this page: First-class trees, 2 to 3 years, 5 feet high, 18c. each, $2.00 per 12, $15.00 per 100. Extra size, 6 feet high, 20c. each, $2.25 per 12, $18.00 per 100.

Western New York Horticultural Society.

My Dear Mr. Green:

The Society owes a great debt of obligation to yourself for your very generous contribution of rare apples of last year. The number of varieties of apples from your nursery that were not included in any other contribution decided the day in our favor. Only a few varieties of any one fruit makes considerable difference in our markings. Your collection of rare apples must be most excellent, from what Mr. Peck tells me, and from what I saw in the liberal donation of last year.

I trust you will kindly instruct your superintendent to favor us again this year. There has been $50.00 added to the prizes, and if I can secure that first again I shall be the happiest man in Western New York. I will arrange with Mr. Peck to go out to your farm if you wish.

John Hall, Secy-Treas.
THE THANKSGIVING HARDY PRUNE. Very productive, good quality and long keeper.

It will keep for weeks and months after picking, like an Apple.—Prunes are plums, plums are prunes, but prunes are plums with much sugar in them. Another year's experience with this valuable prune leads us to think that we have not claimed enough for it. We did not know that it was a very hardy variety until the past winter of 1904 established that fact. Last winter was the most severe ever experienced, and in consequence nearly all plum trees growing in the nursery rows in this country were injured or destroyed. Thanksgiving Prune stood up nobly, not being hurt in the least, where all other varieties but natives were destroyed. Notice that but little space is given to offering other plum trees for sale in this catalogue, as there are scarcely any other varieties left uninjured by the winter. That Thanksgiving Prune is not only a variety of superior merit in many other respects but that it is hardy makes this one of the most valuable varieties of the age. Thanksgiving Prune is also a very vigorous grower; it makes a nice straight tree in the nursery row.

Prof. L. H. Bailey considers it of the Damson family. He says it has distinct merits. He says: "Your prunes keep until about the twentieth of November. This Prune is certainly the longest keeper I have ever seen."

C. A. Green has eaten these prunes in January, and has kept them lying on his desk for two weeks in January, when he ate the rest of them, and there was no sign of rotting. The quality of this prune is superior, sweet and rich. It is the large amount of sugar in this variety that preserves it so long. Thanksgiving Prune ripens about the first week in October at Rochester, N. Y. This is one of the most remarkable prunes ever introduced. It has been thoroughly tested. A few prominent orchardists have planted from one to two hundred trees, paying $3.00 each for them.

Read what the secretary of W. N. Y. Hort. Society says: "One month ago I received specimens of Thanksgiving Prune, placed them in cellar. November 1st I ate and found them sound and of excellent flavor."

Price of Thanksgiving Prune trees, 2 years, largest size, 50c. each, $5.00 per 12; medium size, 2 years, 40c. each, $3.50 per 12.
BURBANK JAPAN PLUM—Very Productive.

Prof. H. E. VenDeman says Burbank is the best of Japan plums. Unsurpassed for beauty and productiveness, as well as great hardiness of tree, with a foliage so perfect as to contribute in an essential degree to its health. Fruit large, oval, often with a slight neck; skin reddish purple; flesh yellow, rather coarse, but juicy and good. Its beauty as a market variety is unsurpassed.

Niagara Plum.—This plum has become exceedingly popular through Western New York, where it originated. It is a very early plum and particularly valuable for this reason. It is a red plum, large size, making an attractive appearance in market, and possesses good shipping qualifications. It bears enormous crops of fruit with great regularity. No one will be disappointed in planting the Niagara plum, either for home use or for market. The tree is an upright grower, vigorous and healthy. I recently visited a plum grower in Niagara county, who was shipping one thousand baskets daily, of the Niagara plum. He informed me that it was bringing the biggest price in the market and was a veritable gold mine to him.

Price for all varieties of Plums named above: First-class trees, orchard planting size, 4 to 5 feet high, 2 to 3 years, 35c. each, $3.00 per 12, $20.00 per 100. Extra size, 2 to 3 years, 50c. each, $5.00 per 12, $27.50 per 100.

NOTE.—All plum trees offered are on plum roots. Plum on peach roots can be grown at half the cost of those on plum roots, but are of far less value.
The Abundance (Japan) Plum.—The Abundance is becoming more popular each season; is large, showy and beautiful. Amber, turning to a rich, bright, cherry color, with a decided white bloom, and highly perfumed. Flesh light yellow, exceedingly juicy and tender, and of delicious sweetness impossible to describe. Stone small and parts readily from flesh. For canning it is excellent. Its season is early in August in this state, adding to its special value. The editor of The Rural New Yorker writes: "From one little Abundance tree we picked ten pecks of fruit. The quality is excellent. When fully ripe they are full of juice. The flesh is tender, and there is mingled with the plum a peach flavor that is refreshing and agreeable." That the Abundance proves to be all that is claimed for it seems now a settled fact.

The Hale Japan Plum.—Prof. L.H. Bailey says of the Hale plum: "A very handsome, large, round-cordate plum; orange, thinly overlaid with mottled red, so as to have a yellowish red appearance.

Gusii Plum (Blue Magnum Bonum).—This is one of the newer varieties originating in New York State. Season of ripening rather late. The color is a dark purple, the flesh is firm, sub-acid, and agreeable. Size large. It would be difficult to select a larger or more attractive plum for the garden or orchard than this.

Grand Duke Plum.—We have had our attention called to this plum, and have watched and fruited it for several years. It is one of the good varieties offered by us.

Bradshaw Plum.—A very large and fine early plum, dark violet red, juicy and good. Trees erect and vigorous; very productive; valuable for market. The tree is very hardy and vigorous. As regards productiveness, it is unequalled by any plum we have ever fruited.

German Prune.—Sells for higher prices in market on account of high quality. A leading favorite. There is no easily grown fruit that gives greater or more certain profit than the German Prune. They were introduced in this country by Germans many years ago, and for a time these furnished the only market for them. But the prune as a fruit for drying has entirely surpassed the plum, and though it is always dried whole, the seed is not troublesome to the eater. The Pacific Coast States have furnished most of the prunes for commerce, but it is a fruit that succeeds equally well in the East, with the advantage that if more grown near our large cities, there will be considerable demand for the fruit for eating when ripened, but not dried.

Damson Plum.—This is the best of Damsons. These are smallish plums, produced in thick clusters or groups, almost hiding the branches from view. It is highly prized for canning and for preserving. The tree is not a rapid grower in the nurseries, is difficult to propagate, therefore trees are always in short supply, and cannot be sold as low as other plum trees.

Reine Claude Plums Ready for Market.

Reine Claude (Bayav's Green Gage).—Roundish, oval, greenish, marked with red in the sun; a great favorite, sweet, rich and excellent.

Price for all varieties of Plums named above: First-class trees, orchard planting size, 4 to 5 feet high, 2 to 3 years, 35c. each, $3.00 per 12, $20.00 per 100. Extra size trees, 2 to 3 years, 50c. each, $5.00 per 12, $27.50 per 100.
York State is one of the largest, best in quality and most productive of all prunes or plums. Size large; color dark blue, covered with purple blush; flesh yellow and delicious; freestone, ripening the last week in August, at Rochester, N. Y. This prune originated at Dansville, N. Y., where it has been grown largely by the Germans, who are great fruit growers. It is a seedling of the German Prune and has been sold by these Germans for German Prune to Buffalo fruit buyers in large quantities at profitable prices. It resembles Fellemburg more than it does German Prune. York State Prune is a vigorous grower, and is healthy and hardy here at Rochester.

Price of York State Prune: First-class trees, 5 feet high, 35c. each, $3.00 per 12, $20.00 per 100. Extra size, 6 feet high, 50c. each, $5.00 per 12, $27.50 per 100.

Russian Mulberry.—Hardy, rapid growing timber tree of value; useful in silk culture. Fruit abundant, small and sweet; fruits on very small trees. The Russian Mulberry is the hardiest of all mulberries, and very valuable. We have several trees upon our Rochester place, and they are loaded with fruit every year, remaining in fruit for three or four weeks. The chickens are particularly fond of this fruit, which drops daily and is picked up quickly by them. The Russian Mulberry is a profitable tree to grow if only for chicken feed, since chickens are so fond of the fruit and thrive so well upon it. One large mulberry tree will furnish, perhaps, ten bushels or more of mulberries, which cost absolutely nothing, since the tree itself is beautiful and furnishes an attractive shade.

Prof. John Craig of Cornell University commends this Mulberry for poultry.—C. A. Green.

Price of Russian Mulberry: 4 to 5 foot trees, well branched, 25c. each, $2.50 per 12. 3 to 4 foot trees, 20c. each, $2.00 per 12.
Bartlett Pear.—Successful as Standard or Dwarf. Dwarf Bartlett pears in C. A. Green's garden only 5 feet high were filled with beautiful specimens. What the Concord is among grapes, the Baldwin among apples, the Crawford among peaches, is the Bartlett among pears. It is the most popular pear, both for home use and market, that the world has ever known. It is buttery and melting, with a rich, musky flavor. The tree is vigorous and rapid in growth. Its season is September. Many people remove half of the fruit in August, ripening this for market, thus relieving the tree of its strain and securing larger fruit from that which remains on the tree. As the Bartlett is liable to overbear, nearly half of the fruit should be removed early in the season when about the size of a hickory nut. If this is done and the trees are kept in cultivated soil and well fertilized, they will bear profitable crops of the finest specimens imaginable. All pears should always be picked before fully ripe to secure best quality.

Clapp's Favorite Pear.—Standard and Dwarf. Season, August, earlier than Bartlett. This is without doubt the most productive pear in cultivation. Every limb is a veritable rope of pears. A splendid pear resembling the Bartlett and ripening a few days earlier. A cross between Bartlett and Flemish Beauty; the tree is hardy and vigorous, either as standard or dwarf. Care should be taken to pick the fruit ten days before it ripens upon the tree. This pear is very large, remarkably beautiful and a prolific bearer. No collection is complete without it. Larger than Bartlett and has a handsome red side.

Flemish Beauty.—A large, beautiful, melting sweet pear. Tree very hardy, vigorous and fruitful; succeeds well in most parts of the country. Needs an open sunny location on well drained soil for best results. Season September and October.

Price of Standard Bartlett, Clapp's Favorite and Flemish Beauty: First-class trees, 2 to 3 years, 5 feet high, 20c. each, $2.00 per 12, $15.00 per 100. Extra size, 25c. each, $2.50 per 12, $18.00 per 100. Price of Dwarf trees: First-class trees, 2 to 3 years, 3 to 4 feet, 15c. each, $1.50 per 12, $10.00 per 100. Extra size, 4 to 5 feet, 18c. each, $1.75 per 12, $12.00 per 100.

Don't overlook the leading tree for shade and street planting—the Poplar. We offer all sizes at bargain prices.

See special offer of Poplars—the most satisfactory shade and roadside tree, which we offer at bargain prices.
Duchess Pear—(Duchesse d'Angouleme) —Dwarf. Trees of the Duchess are great yielders, and being vigorous growers are money makers. What the Bartlett pear is as a standard, the Duchess pear is as a dwarf. The Duchess tree has a vigorous and healthy growth, and bears uniformly heavy crops of large and attractive fruit. There is no pear in existence which outyields the Duchess. The fruit is prized as a dessert fruit or for cooking. Like all dwarf pears, it should have the branches of the last season’s growth cut back at least one-half every fall or in the spring before the growth begins. This is necessary to prevent the trees getting too tall and top-heavy.

Anjou (Beurre d'Anjou)—Standard and Dwarf. A large, handsome pear, buttery and melting, with sprightly, vinous flavor; keeps into mid-winter. Tree a vigorous grower and a good bearer.

Louise Bonne—Standard and Dwarf. Good size, greenish yellow, with a bright cheek. September to October.

Clairgeau—Standard and Dwarf. Very large pyriform; yellow and red; handsome and attractive; flesh yellowish, nearly melting; keeps sound a long time after being gathered. Tree a free grower and early abundant bearer; a magnificent and valuable market fruit.

Vermont Beauty—Standard and Dwarf. A beautiful new seedling pear from Grand Isle, Vermont, up near the Canadian line. Probably the hardest pear grown. Fruit medium size, not quite so large as Bartlett, but much larger than Seckel; skin yellow, nearly covered with bright carmine. A very handsome pear.

Price of Standard trees for all varieties named above: First-class trees, 2 to 3 years, 5 feet high, 20c. each, $2.00 per 12, $15.00 per 100. Extra size, 25c. each, $2.50 per 12, $18.00 per 100.

VARIETIES OF DWARF PEAR TREES.

Anjou, Buffum, Bartlett, Clairgeau, Duchess, Clapp’s Favorite, Flemish Beauty, Howell, Kieffer, Lawrence, Louise Bonne, Seckel, Tyson, Vermont Beauty, Wilder Early.

Price of Dwarf trees, first-class, 2 to 3 years, size 3 to 4 feet, 15c. each, $1.50 per 12, $10.00 per 100. Extra size, 4 to 5 feet, 18c. each, $1.75 per 12, $12.00 per 100.

Don't fail to take advantage of our special offer on all orders received by us on or before March 15th, 1906.
WILDER EARLY PEAR S—Best Very Early Kind.

The Wilder Early Pear pleases all because: First, the tree looks well; it is a good grower. Second, it produces a crop early; two year grafts at the nursery and trees four years old produce a lot of fruit. Third, the quality of the fruit is the best. Fourth, one does not have to wait until frost to get it. It ripens August 1st or before, in warmer localities than ours. Fifth, it is so productive—we remember one branch bearing 27 perfect specimens. Sixth, it is handsome in appearance. And lastly, it is hardy.

**Lawrence.—Late Winter Pear.—Standard and Dwarf.**—Size medium to large, obovate; golden yellow; flesh melting, with a pleasant aromatic flavor. Tree a moderate grower and abundant bearer. This is one of the best winter pears and one that should be in every collection, whether for home use or market. Though not over large and showy, its excellent quality and productiveness place it high in the estimation of all our pear growers.

**Sheldon.**—First quality; large, round, russet and red, melting, rich and delicious. Tree vigorous, erect and handsome, and bears well when grown. As a standard should be more largely planted. Season, October and November. Pick early in September and store in a cold cellar.

Price of Standard Wilder Early, Lawrence and Sheldon: First-class trees, 2 to 3 years, 5 feet high, 20c. each, $2.00 per 12, $15.00 per 100. Extra size, 25c. each, $2.50 per 12, $18.00 per 100. Price of Dwarf trees, first-class, 2 to 3 years, 3 to 4 feet high, 15c. each, $1.50 per 12, $10.00 per 100. Extra size, 4 to 5 feet high, 15c. each, $1.75 per 12, $12.00 per 100.

**Bosc Pear.**—Finest quality, large as Bartlett, very productive. Bosc is a large pear, the size of Bartlett, deep golden yellow, with yellow flesh, of a peculiar shape shown in cut—notice that the cut is greatly reduced in size. Bosc pear resembles Sheldon in quality, but is considered by many as superior to Sheldon and later in ripening. On account, however, of the difficulty of securing trees of this variety it is not largely known and comes under the head of rare varieties. Hardly one planter in a hundred has a tree of this variety, and yet none can be planted with greater confidence for both home use and market.

Price of Bosc Pear trees: Strong 3 year planting size, 35c. each. Medium size, 25c. each. Small size, 15c. each.
SCENE IN PACKING HOUSE, GREEN'S NURSERY CO.

Gans Seedling Pear, New.—This valuable summer pear was sent us by the originator, who is an old friend and patron, six years ago. This has given us time to fruit the pear at Green’s fruit farm and to test its merits. Our C. A. Green is greatly pleased with it. It is a valuable early variety of high quality. Ellwanger & Barry describe it as follows: “A fine early pear, ripening just after Tyson and a week to ten days before Bartlett. It is large and handsome, pyriform in shape, color yellow, with slightly brownish cheek; flesh fine grained, melting, very juicy, sweet, sugary, quality very good. It shows no tendency to rot at the core. Tree a vigorous grower.”

Price for Standard trees: Medium size, 2 years, 35c. Large size, 50c. each. Dwarf trees of Gans Pear, 65c. each.

Worden-Seckel Pear—This is a seedling of the Seckel, which it resembles and fully equals in flavor and quality, and far surpasses in size, color, form and beauty. It is more juicy and equally delicious. For twelve years the tree has not failed to bear a full crop of bright, clean fruit without spraying or any other treatment, showing freedom from tendency to scab. It is more upright and a much better grower than its parent, with rich, abundant foliage, which it retains until late in the season. It has not been injured by freezing, even in the cold locality of its origin, showing its unusual hardness. It is an enormous bearer, ripens a little later than the Seckel, keeps remarkably well, retaining its flavor until the last. It is free from the tendency to decay at the core. It bears exceedingly young, producing frequently large clusters of beautiful pears on three and four-year old standard trees in the nursery row.

Price for medium sized trees: Standard, 35c. each; largest size trees, standard, 50c. each. Dwarf Worden-Seckel, 25c. for medium sized trees, 2 years old; 30c. each for largest size trees.
MORELLO OR HARDY CHERRIES.

MONTMORENCY—Most Profitable Hardy Market Cherry.

Montmorency Cherry.—The most popular of all hardy cherries for market and home use. This cherry is planted largely in orchards at Rochester, N. Y., and in other parts of the country. It is of large size, light red in color, stem rather short. The tree is very hardy and a vigorous grower. The trees bear fruit soon after planting.

Price of Montmorency: First-class trees, 2 years, 4 feet high, 25c. each, $2.50 per 12, $20.00 per 100. Extra size, 5 feet high, 30c. each, $3.50 per 12, $25.00 per 100.

Early Richmond Cherry.—This is a hardy cherry, fruiting on young trees soon after planting. It is the good old variety that yielded such marvelous crops in the gardens of our boyish days. We have at Green's fruit farm quite an orchard of Early Richmond cherry trees that are heavily loaded with fruit almost every year. The fruit does not rot upon the trees, and can be left without picking longer than most varieties. The trees bear fruit regularly each year, and the orchard has been highly profitable.

The tree is a fine grower; hardy, healthy and very productive. One of the best. "If I could plant but one cherry it would be Early Richmond," says American Agriculturist.

Large English Morello Cherry.—Without doubt one of the most valuable of this class. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, and recommended for extremely cold latitudes.

Prices and sizes for Sour Cherry trees of the following varieties: Montmorency, English Morello and Early Richmond: First-class orchard planting trees, 4 feet high, 25c. each, $2.50 per 12, $20.00 per 100. Price for selected largest sized trees, 5 feet high, 30c. each, $3.50 per 12, $25.00 per 100.

GREEN'S NURSERY CO., Rochester, N. Y.—The trees arrived in fine condition and were one of the best lots that I ever received. Up to the present time I haven't seen a single tree but what is growing.

GREEN'S NURSERY CO., Rochester, N. Y.—I wish to thank you most heartily for the fine trees I received from you this spring. Every tree and plant was fresh when received, and all are growing.

G. W. H., New York City.

BATES CHERRY.—NEW.

Bates Cherry.—This is a new and improved variety of the Early Richmond family. It is the largest, darkest colored, and best flavored of any of the hardy red cherries that we have seen. Buds of this variety were sent to us by S. J. Bates of Michigan, a subscriber to "Green's Fruit Grower." Mr. Bates reports that in size the Bates cherry is one-third larger than Richmond, and three shades darker in color. It is eight to ten days earlier than Early Richmond in ripening and ever so much better in quality. Every one in my locality who has seen this cherry, and it has attracted much attention, is delighted with its heavy fruiting, its large size, and superior quality.

Price of Bates Cherry, 2-year-old trees, 40c. each, $4.50 per 12.
The Lipp Late Blood Cherry—(Latest of all Cherries). This new cherry originated with a friend at Lancaster, Pa. It ripens five weeks later than English Morello, and six weeks later than Richmond. Fruit was still hanging on the trees August 8th. Its size is larger than Richmond or Morello. It is a good shipper and easier to pick than other kinds as it has longer fruit stems. Since it is very juicy, and its juice is the color of blood, it makes an excellent wine. Cherries from this tree sold at ten cents a quart, since there were no other cherries in the market at the late date when it ripened. The tree bears fruit very soon after planting. Samples of this cherry were on the table of C. A. Green July 24th, long after other cherries were out of market. It will ripen at Rochester the second week in August. It is almost black in color. It is unlike any other cherry in the world, not only on account of its extreme lateness, but on account of the blood-like color of its flesh and juices, and the meaty character of its flesh. It is a very prolific bearer.

Price of Lipp Cherry trees, 2 years old, 50c. each.

Green's Tartarian Cherry.—In front of our Rochester house are two black cherry trees which are something of a wonder to all who see them. These trees never fail to bear a heavy crop of fine fruit. The trees are perhaps forty years old. They have reached an age when most cherry trees begin to fail and to become unproductive, but these trees are as productive as in their earlier years. A notable peculiarity of the fruit upon these trees is that it remains upon the trees in an eatable condition for nearly three weeks. I have never known cherries to remain so long upon the trees. The fruit from these trees sells in the market more readily than any other fruit we are acquainted with. It is accepted by our marketmen as the Black Tartarian. It has much the appearance of the Black Tartarian, and yet we have never known that good old variety to remain so long in perfect condition upon the trees, which is a desirable feature in prolonging the season for family use. We call it Green's Tartarian cherry, not to indicate that it is a new variety, but to indicate that it is what it is represented to be—a superior strain of the Black Tartarian.

Price of Green's Tartarian Cherry tree, 2 years, 60c. each, $6.00 per 12.

Windsor Cherry.—Tree upright, vigorous and rapid grower; leaves large. Fruit large, roundish, oblong, very firm, juicy, mottled red; flesh pinkish, sometimes streaked. Quality good, heavy bearer. A most desirable late cherry, either in the firm or tender-fleshed varieties. It hangs a long time and does not rot badly. No new cherry of recent years has attracted more attention, owing to its large size, beautiful dark color, almost black; its firmness, its qualifications as a shipper, and its excellent eating qualities.

Price of Windsor Cherry trees, 2 years, 60c. each, $6.00 per 12.

Governor Wood.—This is a superior white cherry with red cheek, of best quality.

Price of Governor Wood Cherry trees, 2 years, 60c. each, $6.00 per 12.

Bing Cherry.—So large in size as to be mistaken for plums. This new and superior sweet cherry originated near Portland, Oregon, is one of very large size, almost black in color when ripe, of fine quality, very productive, a good shipper.

Price of Bing Cherry trees, large size, 75c. each; 1 year trees, 4 feet high, 50c. each.

Prof. H. E. VanDeman says as regards Bing and Lambert Cherries: "They will be entirely successful anywhere that sweet cherries succeed. Their fruit will be larger and more solid than most cherries of their class. I recommend my friends to plant these varieties." In some eastern towns these cherries are so large as to be mistaken for plums. C. A. Green.

Lambert Cherry—(new), one of the largest of all the sweet cherries. So far productive. Color, dark red; flesh, solid; an excellent shipper. Its season being late makes it especially desirable.

Price of Lambert: Large size trees, $1.00 each; 1 year trees, 4 feet high, 75c. each.
Niagara 'Peach.—C. A. Green's favorite peach. This photo-engraving represents three Niagara peaches, and on top of these three is placed one Elberta peach to show the comparative sizes of these two varieties. Niagara is the largest, most beautiful, and most profitable of all peaches. It has been called the improved Elberta. It is better in flavor and quality than Elberta. It ripens between Early Crawford and Elberta. Its foliage is large and leathery, and the trees are remarkable specimens of vigor. It is the great market peach in Western New York.

Vice President J. S. Woodward said of the new peach at the meeting of the W. N. Y. Horticultural Society: "We have a peach which is an accidental seedling of the Crawford. I wouldn't set a Crawford if I could get the peach I refer to. It is about one picking later than Crawford, averages a good deal better, better color, better leaf and holds its size to the end of the season. You can't sell any other tree in our locality if the variety I speak of can be obtained. It is called 'Niagara.'"

Prices of Niagara Peach trees are as follows: Largest size, 25c. each, $2.50 per 12, $20.00 per 100. Medium size, 20c. each, $2.25 per 12, $18.00 per 100. For mailing sizes see prices on mailing page.

Elberta Peach.—Unsurpassed as a valuable, large, beautiful peach of good quality. One of the best orchard varieties, and valuable also for planting in the garden. A friend near Rochester has planted fifteen acres entirely to Elberta. Elberta is harder in bud than many varieties, therefore a more uniform cropper. At Green's fruit farm this year we are harvesting a large crop of Elbertas, and yet we had three consecutive frosts last spring that destroyed nearly all peach buds in this locality. Many people have feared that too many Elbertas would be planted, but I think these fears are groundless, since it is such a valuable variety. Owing to the great demand for Elberta trees, we are compelled to limit somewhat the number of Elberta trees desired with each order, and yet we have a large supply of this variety. Elberta is large, yellow, with red cheek, juicy and high flavored, flesh yellow; freestone. Season medium early, following quick upon Early Crawford.

Price of Elberta Peach, first-class orchard planting trees, 3 to 4 feet high, well branched, 15c. each, $1.50 per 12, $10.00 per 100. Price for selected size trees, 18c. each, $1.80 per 12, $12.00 per 100.

August 24, 1905.
GREEN'S NURSERY CO., Rochester, N. Y.—I received the Strawberry plants all right and was very much pleased with them, they all seem to be growing fine.
J. M., Hoosick Falls.

May 16, 1905.
GREEN'S NURSERY CO., Rochester, N. Y.—Dear Sirs: The trees and plants ordered of you have all arrived in good condition, thanking you for the extras.
O. E., Clinton, N. Y.
Crawford's Early.—A magnificent large yellow peach of good quality. Tree vigorous and prolific; its size, beauty and productiveness make it one of the most popular varieties. Season beginning of September. This valuable peach has long been a favorite for large size, beauty and quality of fruit. Most people, when they buy peaches, ask for Crawfords.

Price of Early Crawford, 15c. to 18c. each.

Early Rivers.—Large, light straw color, with delicate pink cheek; flesh juicy and melting, with very rich flavor. First of July; free. It is truly a fine early peach.

Price of Early Rivers, 15c. to 18c. each.

Prices and sizes of Peach trees, where not otherwise stated, are as follows: First-class orchard planting trees, 3 to 4 feet high, well branched, 15c. each, $1.50 per 12, $10.00 per 100. Price for selected largest sized trees, 18c. each, $1.75 per 12, $12.00 per 100.

APRICOTS.

There is nothing in the way of fruit more delicious than the apricot. There is a mixture of sweetness and delicacy of flavor with a mild acidity hardly perceptible, and an ambrosial flavor which makes it the most tempting fruit that humanity ever tasted. Many do not know the fruit, therefore have not planted. Some know it, but consider it not hardy enough. It is true that the best apricots are not hardy enough for the severest climate, but generally speaking they are hardy and very productive in the best peach and plum growing localities.

Hardy Russian Apricots.—Price of trees, 3 to 4 feet, 25c. each; $2.50 per 12.

QUINCES.

Bourgeat Quince.—This is the most remarkable of all quinces. There is no other variety which grows so vigorously, and there is no other variety of quince which will keep so long in perfect condition.

Price of Bourgeat Quince trees, 4 feet, 50c. each.

Orange Quince.—Everyone is well acquainted with the Orange Quince, a good old favorite that never disappoints the planter—good for home use and for market, and more largely planted—good for home use and for market, and more largely planted than any other variety.

Price of Orange Quince trees, 3 to 4 feet, 50c. each. $5.00 per 12.
CURRANT CULTURE.

Currants are perfectly hardy and may be planted in fall or spring. They succeed best on cool, moist soils, well tilled and well enriched. In warm climates a northern exposure suits them best. Plant the bushes about four feet apart and cultivate well, or mulch heavily, sprinkling ashes around the roots occasionally to keep out borers. If the currant worm appears, dust with hellebore. Prune out the old wood that has ceased bearing.

Fay's Prolific Currant.—A seedling of Cherry that originated in 1868, with Lincoln Fay. It was introduced about twelve years ago and is now generally known. Its clusters are long and attractive, filled with large fruit, making it desirable for market. It is liked at canning factories for making jelly or jam, on account of its large size, thin skin, and rich, juicy pulp.

Bush vigorous, but not as strong a grower as Red Cross. Its canes are somewhat spreading and not always strong enough to remain upright when weighted with fruit. The clusters vary from two and a half to four inches long. The berries vary from medium to very large, averaging large. They are quite uniform in size.

Price of Fay's: 50c. per 12, $3.00 per 100, $25.00 per 1000, for two-year-old plants.

Champion Black Currant.—This is comparatively new, of English origin, but in great demand now by all lovers of the fruit. The quality is excellent, bunches are very large, the flavor of the fruit is particularly delicious. No garden should be without a few plants of black currants.

Price of Champion: 2 years, 50c. per 12, $2.50 per 100, $20.00 per 1000.

The annual fruit crop of the United States has a value of $132,000,000. The orchard fruits produced each year have a value of $54,000,000; small fruits, $25,000,000; grapes, $14,000,000, and citrus fruits, grown principally in California and Florida, $8,549,000.

White Grape Currant.—The largest and best white. Garden not complete without it. Bush moderately vigorous, slender, branches somewhat spreading, productive. Bunches three to four inches long. Berries quite uniformly large, but vary from medium to very large.

Price for White Grape Currants: 2 years, 50c. per doz., $4.00 per 100.

Cherry Currant.—This popular market variety is one of the largest red currants and is valuable for the garden. The Geneva Experiment Station says of Cherry: "Bush vigorous, stocky and compact in nursery. The young plants are upright, but with age they tend to become more spreading."

Price for two-year-old Cherry Currants: 50c. per 12, $2.50 per 100.

Red Victoria.—The latest in ripening. Very productive; bunches long; of excellent quality.

Price of Red Victoria: 2 years old, 50c. per 12, $2.50 per 100.

Wilder.—A new Red Currant, with large, fine-flavored fruit of a bright, attractive red color, even when overripe. In some trials it has outyielded the Fay Currant; is as large, with longer bunch, less acid, ripens at the same time and hangs longer. Few varieties equal it in the two essential qualities of productiveness and long-keeping.

Price of Red Wilder: 2 years old, 75c. per 12, $5.00 per 100.

If you desire currants by mail add 10c per doz. to doz. prices. See mailing plant pages.
Green's receipts from one-half acre Red Cross in 1903, $537.00; 1904, $482.88.

Red Cross Currant is sweet. It is natural to connect sourness with all red currants, since, as a rule, red currants are exceedingly acid, but Red Cross currant is an exception to the ordinary rule, being the sweetest currant ever produced in the way of red currants. I know of no more appetizing or healthful dish than a dish of Red Cross currants at the table to be eaten the same as strawberries, raspberries or other sweet fruit. In calling attention to the characteristics of Red Cross, this qualification of sweetness and palatableness has not been properly emphasized. In making currant jellies, or in preparing currants in other ways, remember the Red Cross currant requires only half the sugar that many other currants require owing to the natural sweetness and fine flavor of Red Cross.

Prof. Maynard, of Amherst College, (Hatch Experiment Station, Mass.,) says Red Cross currant, as seen at Rochester, averages larger than Fay's Prolific, and is more vigorous. Jacob Moore, the originator, to whom we paid $125.00, saw it in fruit here and says it is twice as large as Victoria, will yield twice as much as Cherry, and is of better quality than any of the older varieties.

P. C. Reynolds, the veteran horticulturist of Rochester, N. Y., says that the Red Cross currant averages larger than Fay's or Cherry, and is sweeter than most other varieties. He says that the clusters are longer and that the size of the berry holds out larger to the end of cluster than Fay. C. M. Hooker, the largest small fruit grower in Monroe County, N. Y., says that Red Cross currant as seen at our Rochester place, is larger than Fay's with longer fruit stems. He says the growth is remarkably vigorous, and the plants healthy and free from fungus. He says, "Book my order for 100 plants." Price of Red Cross, 2 years, strong, 50c. per 12, $2.00 per 50, $3.50 per 100, $32.50 per 1000. 1 year bushes, 25c. per 12, $1.25 per 50, $2.00 per 100, $18.00 per 1000.
THE CHAS. A. GREEN NEW WHITE GRAPE.

After fruiting this new white grape for several seasons at my Rochester place I am satisfied that it is a valuable variety, a vigorous grower, and an enormous yielder of very large and beautiful clusters of excellent fruit. This variety was sent to me by F. W. Loudon, Janesville, Wis., the originator of Loudon red raspberry, Jessie straw berry, Janesville grape and other valuable fruits. He named it the C. A. Green grape, wishing to honor me for having done him a service in introducing Loudon raspberry and the Jessie strawberry. We have hitherto had trouble in supplying patrons with 2-year old vines of this variety, but now we have a good stock of very strong vines. Notice that we have reduced the price so that all can afford to plant it.

Price of Chas. A. Green Grape, strong 2-year-old vines, 15 cents each, by mail or by express, 50 for $4.50, 100 for $9.00.

NIAGARA HARDY WHITE GRAPE.

Popular everywhere. Bunch very large and handsome, often shouldered, compact; berries large, round; skin thin, tough, does not crack and carries well; has not much pulp when fully ripe, melting, sweet, with a flavor and aroma peculiarly its own, and agreeable to most tastes; ripens with Concord, sometimes a little earlier. Vine very vigorous and productive, succeeding well in all sections. Is largely planted by vineyardists.

Price of Chas. A. Green Grape, strong 2-year-old vines, 15c. each, $1.50 per 12, by mail or by express, 50 for $4.50, 100 for $9.00.

HELP! HELP!!
GRAPE VINES
AT A BARGAIN.

One-third off Regular Price. Must be Sold.—We offer 3 Worden, black; 3 Concord, black; 1 Campbell's Early, black; 2 Chas. A. Green, white; 3 Niagara, white—all 2 year old first-class grape vines for 98 cents, regular price being $1.35. We have car loads of grape vines of the finest quality and best varieties that are dug and must be sold.
CONCORD—Monarch of Hardy Grapes.

Concord Grape.—This hardy black grape is decidedly the most popular grape in America, and deservedly so. Bunch large, shouldered, compact; berries large, covered with a rich bloom; skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet pulp, tender; vine a strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable variety.

Price of Concord vines, 2 year, 8c. each, 75c. per 12, $3.50 per 100, $25.00 per 1000; 1 year, 5c. each, 50c. per 12, $2.50 p.r 100, $20.00 per 1000.

Worden Grape.—If you fail to plant Worden grape you will make a mistake. When it was first introduced it was claimed to be the same as Concord, since it resembles Concord in many respects. It is, however, much earlier than Concord in ripening and larger in size of berry. Its earliness of ripening is a strong point over Concord. It will not ship, however, so well as Concord, being tender in skin, but for home use I know of no grape of greater value.

Everyone plants it. It is an enormous crop per and its vines are vigorous enough to ripen such crops, but the more fruit a vine carries the later will it ripen its fruit. Worden is ripe and gone before Concord comes in. It is an early black grape, very large in cluster and berry, of good quality, selling well everywhere. In brief, Worden is an improved Concord, being larger in both bunch and berry, handsomer, nearly two weeks earlier, and of better quality. Surely this is enough to please all. If only one grape vine can be planted, plant the Worden.

Price—Strong vines, 2 year, 8c. each, 75c. per 12, $2.95 per 100, $27.00 per 1000; 1 year, 5c. each, 50c. per 12, $2.75 per 100, $22.00 per 1000.

Eaton.—New Black Grape. This is the largest berried grape we have ever grown. Its large size causes its sale quickly when offered in the market. The Rural New Yorker says: Eaton bears the largest bunches and berries of any variety in the R. N. Y. collection, and the vine is loaded. It ripens just with the Worden.

Price of Eaton grape, 2 year vines, 25c. each.

Moore's Early.—Clusters of medium size; berries large, round, black, with heavy blue bloom. Desirable for market on account of its earliness, well suited for Canada and northern portions of the United States.

Price of Moore's Early—2 years, 10c. each, $1.00 per 12, $7.00 per 100.

Campbell's Early Grape is a new variety of the Concord type, of great promise. It is one of the strongest growers, and one of the most hardy varieties. It ripens with Moore's Early ahead of Worden; quality is good and it is a long keeper. Its long keeping and good shipping qualities are really marvelous and unequaled by any other other variety, old or new; and I still believe that it is and will be the most profitable to grow. All I know and can influence I shall advise to plant and grow as many Campbell's Early as they possibly can. It is the best of all American grapes.

Price of Campbell's Early: Strong vines, 15c. each, $1.50 per 12, $12.00 per 100.

GRAPE VINES AT A BARGAIN.

One-third off regular price. Must be sold.—We offer 3 Worden, black; 3 Concord, black; 1 Campbell's Early, black; 2 Charles A. Green, white, 3 Niagara, white; all 2-year-old first-class grape vines for 98 cents, regular price being $1.35.
THE REGAL LONG KEEPING RED GRAPE.

If you want the longest keeping grape, one that you can eat during fall and winter months, plant the Regal. Read what C. E. Barnes, of Talmadge, Ohio, the grape expert, says of Regal, as follows: "Regal is a short jointed, vigorous and healthy grower, ripening its wood early. It is hardy in both bud and cane, enduring 30 degrees below zero. Regal is exceedingly productive, ripening a heavy load of fruit well without injury to vines. Clusters of Regal are of a desirable size, medium to large, cylindrical, very compact and handsome. Berries of Regal are large, persistent, translucent, dark bright red with a skin thin but tough. The pulp is tender, parting easily from its seed. The quality of Regal is the best. Regal ripens with Concord. Its quality is equal to Catawba or Ulster. Regal grape keeps well owing to its tough skin and persistent nature, keeping in fine condition late in the season. I believe it will be a good shipper." C. A. Green says it is splendid for home or market. Good in every way and a long keeper.

We are offering one of the best grapes known in the Regal. A vine planted in 1901 bore 18 clusters in 1902, and in 1903, 110 clusters. Its great vigor, its productiveness, hardiness and its long keeping qualifications make it of great value. It has been tested at the Geneva, N. Y., experiment station, and has been favorably mentioned by that station. Matthew Crawford, the veteran Ohio fruit grower, has tested it upon his place for many years and speaks of it in the highest terms. Storrs, Harrison & Co. write us that they are greatly pleased with Regal grape. R. A. Hunt, of Euclid, Ohio, pronounces Regal a long keeper that should sell at good prices. "Sweet and vinious, evidently a good shipper and keeper," says Col. G. B. Bracket, U. S. Pomologist. I am delighted with it.—C. A. Green.

Matthew Crawford, the veteran Ohio fruit grower, has fruited the Regal grape for several years and thinks highly of it. He writes us recently that his vines have not been sprayed for two years and yet they are perfectly healthy and are heavily laden with fruit. He says if he could have but one variety of grape, it would be the Regal.

Price of 2 year vines of Regal grape, by mail or express, 50c. each.
Downing Gooseberry.—The largest and best of all native American varieties; see illustration above. The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew. This variety is recommended as proof against mildew. Downing is free from spines, of a transparent color, tending to yellow; bush upright, keeping the fruit from the sand. Downing is enormously productive. Since plants of Downing can be produced in America and plants of foreign varieties cannot, Downing plants can be sold at a lower price, which is another inducement for planting. In order to make the Downing gooseberry known to our patrons we mark herein perhaps the lowest price ever made for such strong, vigorous plants. An acre of Downing can be made to yield $500. It is unsurpassed for canning. It is easily harvested by stripping the branches with a gloved hand, enabling the picker to gather many bushels in a day. The winnowing of leaves is done by an ordinary fanning mill, the same as beans. They can be shipped from Maine to California like marbles.—C. A. Green.

Price of Downing Gooseberry: 2-year-old bushes, first-class, 60c. per 12, $5.00 per 100, $50.00 per 1000.

Chautauqua Gooseberry.—A large yellow variety of American origin. It is without doubt the best variety of gooseberry ever originated in this country. The bush is a vigorous, stout, stiff, upright grower. Its leaves are large, glossy, and dark green; its fruit is of a beautiful light yellow color, perfectly free of spines and hair, veined and translucent, averaging in size 1 to 1 1/4 inches in diameter, although we have often grown them 1 1/2 inches long. Our Chas. A. Green saw fruit of this variety first at the World's Fair. It made a wonderful show, surpassing all others. The bushes were a marvel of productiveness, and all the fruit large, and a beautiful yellow color. It has fruited on our own grounds at Clifton, N. Y., several years, producing an extra heavy yield the past season, surprising everyone there, for after being used to the other American varieties it was not expected that Chautauqua would so much eclipse them. It will not be long ere the fruit of the gooseberry will be general in the market. It is a delicious fruit and a fruit that everyone is fond of, a fruit that everyone could have if they had a garden or field. Last season we had several rows fruiting on our grounds in Rochester—and such fruit. So large that passers-by were attracted as they passed by in the distance.

Price of Chautauqua Gooseberry: Strong, 2-year bushes, 15c. each, $1.50 per 12, $10.00 per 100.

Industry Gooseberry.—An English variety which is being largely planted in this country. The Industry is marvelously productive and bears second, if not the first, year planted. It is very popular in England. The fruit is of large size; color dark red. It is delicious for dessert; some prefer Industry to apricots or peaches. At Green's farm it bears heavily every year. We eat all we can and sell many bushels.

Price of Industry Gooseberry: 2-year, strong bushes, 15c. each, $1.75 per 12, $12.00 per 100.

Columbus Gooseberry.—Fruit very large, green, inclined to straw color, of excellent flavor, carries well to market. Bloom is well protected by early foliage, making it one of the surest croppers. We have fruited this variety several seasons, and on account of its productiveness, believe that every one of our patrons should have one or more bushes.

Price of Columbus Gooseberry: 2-year, 15c. each, $1.50 per 12.

Red Jacket.—An American seedling of large size, smooth, prolific and hardy, of best quality. Has been well tested over a wide extent of territory by the side of all the leading varieties, and so far the most free from mildew, both in leaf and fruit, of them all. A wonderful cropper, with bright, clean, healthy foliage.

Price of Red Jacket Gooseberry: 2-year, 15c. each, $1.75 per 12, $12.00 per 100.
Eldorado Blackberry.—The hardiest and sweetest blackberry. At Green's fruit farm this variety has never winter- killed or failed to produce a full crop of the finest fruit. The vines are very vigorous and hardy. Berries are very large, jet black, borne in large clusters, and ripen well together; are very sweet, melting, pleasing to the taste, have no hard core, and keep eight to ten days. C. A. Green.

"The Eldorado is the most promising of the newer hardy blackberries. It appears to be as hardy as Snyder, and is larger and of better quality."—Ohio Experiment Station.

"From last year's experience I can say that the Eldorado is an immense producer, the berry ripens evenly and is very sweet, medium in size, second early. The yield was much greater than that of any other variety on our grounds last year."—Geo. C. Butz, Horticulturist State College, Pa.

Price of Eldorado Blackberry, 65c. per 12, $3.00 per 100, $25.00 per 1000.

Green's Blackberry Collection for the Garden: 39 plants for $1.48; 3 Chas. A. Green New Hardy Blackberry, 12 Eldorado, 12 Snyder, 12 Minnewaska. Catalogue price, $1.05; our Bargain Price, 39 plants for $1.48, by freight or express.

GRAPE VINES AT A BARGAIN.

12 Vines for 98 cents.

We offer 3 Worden, black; 3 Concord, black; 1 Campbell's Early, black; 2 Chas. A. Green, white; 3 Niagara, white—12 two-year-old first-class grape vines for 98 cents, regular price being $1.35.

Snyder Blackberry.—This popular, hardy and profitable blackberry is known everywhere and planted largely. Where other varieties have entirely failed it proved itself entirely hardy. It is also grown in localities where hardness is not the prime and first consideration because of its productiveness and general adaptability to all locations. It is the blackberry for every fruit grower desiring to make a start in blackberries, but has not the means to buy the high-priced varieties. Keep the soil rich with barnyard manure and wood ashes and no one will complain of the size of the Snyder. We have grown it for twenty years and shall continue to plant it, as it usually gives a good picking where many other varieties have failed. This is the standard early sort for the North and Northwest, and is very popular. This was the first of the hardy kinds that made a sensation over the country. With good culture they are large enough to satisfy all. Like old dog Tray, it is ever faithful. The severest frost does not bite it. Season early; oblong oval in form; quality good.

Price of Snyder Blackberry, 50c. per doz., $1.50 per 100, $14.00 per 1000.

Minnewaska.—This wonderful, hardy, productive, good blackberry has not been forgotten by us, or our old patrons. Its principal points are hardiness, excellent quality, earliness, and continued bearing and productiveness. The originator told our Chas. A. Green that on his three-quarter acre patch he picked forty bushels every day for eight weeks. We sent several hundred miles to see it, and found the bearing bushes tall and bushy and the rows wide, and loaded with fruit in such a manner that even our imagination could not have done justice. Some of our friends were surprised when we published the report above—such an immense yield.

Price of Minnewaska Blackberry, 50c. per 12, $2.50 per 100, $18.50 per 1000.

In ordering by mail add 10c. to dozen and 40c. to hundred prices quoted, and they will then be sent postpaid.

SAVE $100 TO $200 IN BUYING TREES OF US FOR YOUR ORchARD.

We grow the trees and sell them ourselves. They go direct from our nursery to your home. We do not employ any agents or salesmen. When you buy Green's trees you pay the actual cost of growing and our small profit. This profit is small because we sell millions of trees yearly. A tree agent may only sell 100 trees where we sell car loads, and he must charge extravagant prices to meet his expenses. Then he has to buy his trees, whereas we grow our trees, thus we know our trees to be true to name.
McINTOSH RED APPLE

There is no better apple, no handsomer apple, no hardier apple in the world than McIntosh Red. It originated in Canada, hence its hardiness. Size medium to large. Color dark bright red; flesh white, tender, juicy and refreshing. It is a good annual bearer of marvelously handsome fruit.

Price of McIntosh Red Apple Trees: Largest size 35c each; medium size, 5 feet, 30c each; small size, 3 to 4 feet high, 20c each.
We are the Oldest Nursery Firm in the World!
Receiving Orders Entirely Through the Mails.

Our Charles A. Green originated this method of doing business in a large way in 1874. We are the best equipped of all nurseries for the mail order trade. We are incorporated under New York State law, with $100,000 capital, fully paid. We have the largest buildings and storage cellars and more land devoted to the growing of trees than any other exclusively mail order nursery in the world. We have 150,000 customers scattered over every state and territory. Where once we had only one patron in a village or township, now we have large numbers. Our pleased patrons have thus extended our business.

Since we grow our own trees, we can be sure that they are vigorous, healthy and true to name.

PLANT BETTER TREES AND SAVE HALF OF YOUR MONEY

If you buy of tree agents or peddlers more than half the money you pay them goes to the agent himself, for his wages and expenses. This you save by buying direct of us, the producer. If you wish to find the agent who sold to you, you cannot do so, but you can always find us at Rochester, N. Y., where we have been growing trees for 25 years past.

There is a difference between wholesale and retail prices of trees. We are selling trees to planters at nearly wholesale prices. How can we do this? We can do it for the reason that we do not have to pay salaries to tree agents and tree peddlers to canvass the entire country. We have no tree agents. Our catalogue is our only salesman. Those nurserymen who sell through tree agents spend half the money they get for the sale of trees in paying agents and agents' expenses.

Greens Certificate Worth Money.
If sent in with order on or before March 15th.

Green's Nursery Co.,
Rochester, N.Y.
THE CUTHBERT RED RASPBERRY. LARGE, PRODUCTIVE, ATTRACTIVE.

This is a valuable variety well tested throughout the country. It has given good results both for home use and market. When it was introduced the demand for plants was far beyond the capacity of any one to supply, and it marked a new era in raspberry growing. Previous to the Cuthbert, red raspberries were a novelty in the market and sold at from fifteen to twenty-five cents per quart. Cuthbert was largely planted, and it succeeded so well as to bring about a lower price for the fruit, which for a time discouraged planters. But the last year or two there has been a great scarcity of red raspberries, and the price has again advanced so that this year the price opened at twenty cents per quart, and did not go lower than fifteen cents per quart even at Rochester, where red raspberries are largely grown. Cuthbert is a good vigorous grower and possesses vitality necessary for a popular variety. It yields bountifully of large and beautiful bright red berries, which are easily picked and always command good prices. No fruit grower can afford to omit planting Cuthbert, and surely no person who has a garden should attempt to get along without red raspberries. My friend planted a few rows of Cuthbert in the garden of his married daughter the past spring. This demanded the work of half an hour, and yet these few plants will yield that family an abundant supply of delightful fruit for many years.

Price of Cuthbert raspberry plants, 35c. per 12, $1.00 per 100, $8.00 per 1000.

Loudon Red Raspberry.—The Loudon does not sucker nearly so much as do many other red raspberries. Sucker plants springing up about the parent plant are considered a nuisance to the grower of fine fruit, since these suckers have to be removed the same as weeds. Other red raspberries will send up ten suckers where Loudon will send up one. This makes less work for the producer of fruit, but at the same time makes plants of the Loudon raspberry less plentiful, therefore whoever buys Loudon plants should expect to pay more for them than for those kinds which can be propagated much more rapidly. The tendency with Loudon is to begin bearing fruit immediately after planting. I can always find an abundance of berries in July on plants set out in May. This fruit should be removed before it ripens or the plants will be enfeebled. Then, after the main crop of fruit has been produced on the Loudon plants, new canes begin to bear fruit, producing a second crop in August and September. These peculiarities show the tendency of the Loudon to great productiveness. It produces fruit in large amounts and is unsurpassed in this respect. Loudon raspberry made a great showing at the Pan American Exposition at Buffalo last summer. Prof. Van Deman, who had charge of the fruit exhibit there, has pronounced Loudon the best of all red varieties. Considering its hardiness, productiveness, large size, quality and bright color, it will be difficult to secure a better variety than Loudon.

Price of Loudon red raspberry plants, first-class plants, 60c. per 12, $2.50 per 100.
Kansas Black Raspberry.—Is of the largest size, vigorous, healthy and productive. It is a leading favorite at Green’s fruit farm. When I was a boy I delighted to gather the wild black raspberries, but in those days I never met with anything like the Kansas. Fruit is large and excellent in quality. We have fruited it several seasons and find it an excellent variety.—C. A. Green.

Read what a leading firm says: “Kansas is a strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops. Early, ripening just after Palmer. Berries size of Gregg, of better color; jet black and almost free from bloom; firm, of best quality, presents a handsome appearance, and brings highest price in market.”

Price of Kansas, 35c. per 12, $1.50 per 100, $14.00 per 1000.

Nemaha.—The best late variety. The Nemaha is an excellent, large, black, good quality, late variety. The very fact that it is considered to be better than the Gregg is enough to cause it to be planted by every grower of black raspberries desiring a late variety. In Wisconsin large fields of the Nemaha are seen. It originated in that state, and therefore it is no wonder that it is hardy. One grower in Wisconsin who has ten acres of this famous raspberry, says: “Nemaha yields nearly 150 bushels to the acre.” We saw its value some years ago and introduced it. Nemaha excels in hardiness of bush and in quality of fruit.

Price of Nemaha, 50c. per doz., $2.00 per 100, $15.00 per 1000.

Gregg (Black) is the favorite for general planting when a late variety is needed. It produces a heavy crop of large sized berries. This variety is perhaps more generally known and planted than any other. The fruit sells well for home canning or for drying purposes.

Price of Gregg, 35c. per 12, $1.50 per 100, $14.00 per 1000.

Shaffer’s Colossal is an immense raspberry, both in cane and fruit. Canes are of wonderful vigor and size, hardy and enormously productive; berries are very large and of a purplish color.

Price of Shaffer, 50c. per 12, $1.50 per 100, $13.00 per 1000.

POPLAR TREES.—Car Loads in Surplus.

We fear we have more of these beautiful and popular street and shade trees dug than we can sell, therefore we will make a special low price to those who desire them in lots of 25, 50, 100, 1000 or by the car load. These trees are just the right size for planting. They are not overgrown. We offer Poplar trees, 6 to 7 feet, 8 to 10 feet, also 10 to 12 feet high. Carolina Poplar is round headed, something like an apple tree. It has monstrous leaves. It is a rapid grower. It is beautiful in all stages of growth. Lombardy Poplar is an upright grower like the steeple of a church and is used by landscape gardeners to give marked effect. It is made a landmark along highways, or by farmers making their homes conspicuous features in the landscape. There is no other tree so healthy and enduring for city or village streets as the Poplar. We offer both the Carolina and Lombardy Poplar at bargain prices. Let us know how many you want so we can make you special pen prices.

Russian Mulberry is the hardiest of all mulberries, a profitable tree to plant in your chicken yards. Don’t fail to order a few trees at low prices offered on page 23.
CONRATH—EARLIEST AND BEST BLACK RASPBERRY.

Conrath, Early Black-Cap Raspberry has distinguished itself at Green’s farms for many seasons. It is our leader for market or home use. In Conrath we have united vigor, hardiness, large size and productiveness; qualities that will give it a foremost rank. It resembles Gregg in many ways, being probably a seedling of that variety, and the fruit retains its large size to the last picking. The canes are of iron-clad hardiness, very prolific, and make a good healthy growth. It is one of the best of the very early black-caps, equaling the largest in all points, with the Gregg type of berry, being large, firm, sweet and good; free from the woolly appearance of Gregg. The fruit leaves the stem easily, and may be gathered without crushing or breaking. Wherever it has been grown it has given great satisfaction, and we can recommend it as exceedingly valuable. Our attention has been repeatedly called to the success of this black raspberry. We have sent out inquiries to various parts of the country to learn how it has succeeded, and the reports without exception have all been favorable. Price of Conrath, 35c. per 12, $1.50 per 100, $14.00 per 1000.

Eureka, the Earliest Black Raspberry,—
This is one of the newer varieties for which great claims were made from a number of experiment stations where it had been tested. It had strong, stocky, free-branching canes, and is hardy and healthy; it is as early as Palmer, as large as Gregg, and as productive as both combined; better quality than either, holds its size to end of season, and is a good keeper. Price of Eureka, 35c. per doz., $1.75 per 100.

Columbian Raspberry is a new variety, much resembling Shaffer in growth of bush and fruit. A strong grower, unexcelled for productiveness and desirable for canning. At Green’s Fruit Farm nine rows, 150 feet long, yielded 66 bushels. Color of the berry purple, like the Shaffer.

Price of Columbian, 50c. per 12, $1.75 per 100, $15.00 per 1000.

No charge for packing on orders received at prices quoted in this catalogue.
Asparagus Culture.—Plant in rows 3½ feet apart, and one foot apart in the rows. Let the lower ends of roots extend down as far as they can, but do not cover the crowns deep at planting. Plant by opening a trench or furrow. Lay the plant on the side of the trench, with the top or crown 3 inches from the surface. Then cover roots and crown, but see that the crown is covered but slightly, or it will rot. As the new shoots come up you can fill up the trench and cover over the crown. The ideal conditions would be a deep sandy loam with easterly, southeasterly or south-western slope, as warm as possible and sheltered from prevailing cold winds.

Conover's Colossal Asparagus.—There is probably no vegetable that is so absolutely superb to the delicate appetite of the epicure as the first delicious cuttings of this early asparagus, and no vegetable more beneficial as an appetizer to persons of sedentary habits, and it is difficult to account for its cultivation being so much neglected by the community at large. In country gardens it is more rarely to be found than any other vegetable, although so healthful and nutritious; yet everyone who knows anything about gardening, having a plot of ground, should have an asparagus bed. This good old variety is known everywhere; is of large size, rapid in growth and of good quality. Grown on black muck land on our grounds at Clifton, it is mammoth in size and continues to give good cuttings for a long season.

Price of Conover's Colossal Asparagus: Large 2 year plants, 25c. per 12, 75c. per 100, $4.75 per 1000.

Horse Radish.—Will stand a great deal of hardship and will persist in soil year after year. Plant in deep, rich, cool soil. The yield will vary according to the soil and treatment. As high as ten tons have been secured from an acre.

Price: Strong sets, 25c. per 12, 50c. per 100.

Sage (Holtt's Mammoth).—Price, large bushy plants that have been grown in the nursery row, 10c. each, $1.00 per 12, $5.00 per 100.
ASPARAGUS THE BEST EARLY VEGETABLE.

Palmetto Asparagus.—This is a large growing variety particularly delicious in quality. No home garden can be complete without it. Asparagus is one of the greatest garden delicacies, coming in at a season when there is no competitor. When once planted this will continue to produce abundantly for life. The plants late in the season are objects of great beauty, and are worth growing for their beauty. Palmetto Asparagus is valuable for its health-giving properties. It is also appetizing and is a rare delicacy for any table.

Price of Palmetto Asparagus: Strong 2 year plants, 30c. per doz., 85c. per 100, $5.00 per 1000. Asparagus plants will be sent by mail postpaid at dozen rates, and in 100 20c. is added to the 100 price.

RHUBARB, OR PIEPLANT, FOR FAMILY OR MARKET.

We have millions of well-rooted Rhubarb plants for sale. Our propagator had such good success it looks as though we could supply the world. We are glad that we have this big supply on hand for the reason that we believe that these Rhubarb roots, when planted in the gardens of our friends and patrons, will prove a blessing. Rhubarb is one of the most healthful foods known. When spring opens the human system needs an acid. Fruits have not yet supplied these acids, therefore rhubarb, or pieplant, is the only source. Those who eat pieplant pie and sauce freely are greatly benefited. Do you realize what excellent sauce can be made of rhubarb?

Have you a bed of pieplant in your garden? If not do not fail to start a bed this spring. I prefer to plant a solid row of pieplant running. This row will not prevent plowing and cultivating the garden with a one-horse cultivator, and the row will not be in the way nearly as much as a bed devoted to pieplant. Pieplant is one of the most easily transplanted of all plants. It is sure to grow, and once planted will continue to produce an abundant supply for the family for life. The richer the ground the more luxuriant the growth, and the longer the stalks. Set 12 to 18 inches apart in the row. For ornament alone it pays to plant it.

Price of strong Pieplant roots, lower than ever before, 10c. each, $1.00 per 12, $5.00 per 100.
GREEN'S PINEAPPLE FLAVORED STRAWBERRY.

If you want the best flavored strawberry, one of the greatest yielders of large and beautiful fruit; if you want one of the most vigorous growers. If you want a variety that will please your patrons and from which you can make lots of money, plant Green's Pineapple Flavored Strawberry. The past year has been a poor one for making strawberry plants. The nights were cold and not favorable for strawberry growth. This variety came out ahead of the others for making plants the past season, hence the great reduction in price which we have made for plants. Last year the price was $25 per 1000, now we offer them at $5 per 1000. But you will have to speak quick if you want these plants since they will go like hot cakes.

No acceptable name has been sent us for this strawberry therefore it is a nameless strawberry. It was introduced by Green's Nursery Co. We have watched it for the past ten years, therefore with us it is not a new variety, but one that has been thoroughly tested. We are confident you will be surprised and pleased with this variety when you see it fruiting upon your place. So says C. A. Green.

Its History.—A strawberry grower at Mt. Morris, N. Y., discovered a valuable new strawberry. After testing this variety, he destroyed all other varieties, and planted nothing but this new one. He has secured each year an immense crop of large and handsome berries, which sold in the local market at prices far above those of ordinary strawberries. Not only is this new variety very vigorous and productive, and the fruit large, but the quality is superior, having a rich pineapple flavor.

Mr. C. A. Green made a visit to Mt. Morris. He was delighted with what he saw.

Wm. Sage says: "A friend of mine at Mt. Morris, N. Y., sent me plants of the new strawberry, which I planted in my garden at Rochester, N. Y. This bed of plants bore the largest and most beautiful strawberries I have ever seen, and not only this, but the quality of the fruit was most remarkable, being superior to that of other varieties. I can recommend this variety with great confidence to all who are interested in fine strawberries."

Price of Green's Pineapple Flavored, layer plants, 25c. per 12, 75c. per 100, 500 for $3.00, 1000 for $5.00.
LAYERS STRAWBERRY PLANTS.

Senator Dunlap.—At Green's fruit farm it has no superior as an early variety. It is an all round, rough and ready producer, sturdy plant and heavy cropper of best quality berries. I have compared it with eighty-two other varieties and do not hesitate to say that it has greater merit than any other berry. With clean, healthy foliage which has no tendency to rust. The berries are very large, roundish conical, regular, with slight neck. In color they are glossy crimson, with the meat firm and solid, deep crimson throughout, and good in quality. It is a wonderfully productive strawberry. Altogether Senator Dunlap is the most attractive strawberry I know of.

Price of Senator Dunlap, layer plants, 25c. per 12, 75c. per 100, $6.00 per 1000.

Corsican, biggest berry on earth.—This is C. A. Green's favorite strawberry. We have sent it out by the hundred thousands to every post office from the Atlantic to the Pacific oceans. It is a great strawberry for many reasons. First, it is the biggest berry; second it is the brightest and best in color; third, it is a great yielder and producer; fourth, and the most important of all, the foliage is exceedingly vigorous and leathery, resisting fungus, drought, weeds, and even neglect of cultivation.

Price of Corsican layer plants, 25c. per 12, 1.00 per 100, $5.00 per 1000.

Brandywine.—A very late and firm berry; a good shipper, good canner; a good all round strawberry. This strawberry is being largely planted, and much liked. In plant it is a luxuriant grower, healthy and early and very productive; blossom perfect, fruit large, of good form, bright red all over, and good quality. Season medium to very late. It succeeds on any soil.

Price of Brandywine, layer plants, 25c. per 12, 1.00 per 100, $5.00 per 1000.

Glen Mary.—One of the best varieties at our fruit farm.—C. A. Green. Recommended for the home garden and near market. It is fairly firm and will bear shipment comparatively well. When Crescent will bring 5c. and Bubach 10c. per quart, Glen Mary ought to bring 20c. per quart if size and quality cut any figure in the price, and its my opinion that for size, productiveness and quality the Glen Mary has no superior.

Price of Glen Mary, layer plants, 25c. per 12, 75c. per 100, $5.00 per 1000.

POT GROWN STRAWBERRY PLANTS.

How we grow our Strawberry plants in pots.

Potted Strawberry Plants are excellent for summer planting, enabling one to plant in hot, dry weather without loss if properly handled. There is not the check to them consequent upon transplanting, as is the case with ordinary layer plants, and pot grown plants may be set any time with a reasonable hope of a good crop of berries the following year. When shipped by the nurseryman the balls are taken from the pots, wrapped in paper and packed closely together. In planting soak the balls for a few minutes.

WE OFFER THE FOLLOWING VARIETIES OF POT GROWN STRAWBERRY PLANTS.

Corsican, Senator Dunlap, Brandywine, and Green's New Pineapple Flavored. Price of Pot Grown Strawberry Plants, 60c. per 12, $3.50 per 100.
THE POPLAR
A Rapid Growing Ornamental Tree.

This is a sightly tree, rapid growing, easily transplanted, making a delightful shade. This tree has been more largely planted of late than ever before. It will grow twice as fast as an ordinary tree, therefore where quick results are desired there is nothing superior to the poplar. Along the beautiful streets of Rochester in many places every other tree planted has been the poplar. Between each poplar was planted an elm or Norway maple. The poplars grow rapidly and make an immediate effect. Trees are often desired for planting in front of objectionable out-buildings, or to screen unsightly outlooks, and nothing can excel the poplar for this purpose.

**CAROLINA POPLAR.**

Carolina Poplar—For a quickly growing shade tree there is no tree which equals the Carolina Poplar. It is broadly pyramidal in form, very robusting growth, with large, glossy, deep green leaves. It stands the smoke and dust of the city streets better than any other shade tree. Very useful for planting as a screen to shut out unattractive buildings.

Special Bargain—Price of Carolina Poplar trees, 8 to 10 feet, 20c. each, $2.00 per 12, $15.00 per 100. Extra large, 10 to 12 foot trees, selected, 35c. each, $3.50 per 12; 6 to 8 feet, 17c. each, $1.75 per 12, $13.50 per 100.

**LOMBARDY POPLAR.**

Lombardy Poplar—Known everywhere owing to its tall, pyramidal growth. A group of Lombardy Poplars upon a lawn produces a most spiriting effect. At Rochester it is planted thickly in the form of a tall hedge, and in this way acts as a screen to shield the house from the stables or any other objectionable object.

Bargain—Price of Lombardy Poplar trees, 6 to 7 feet, 17c. each, $1.75 per 12, $12.00 per 100. Extra large, 8 to 10 foot trees, 35c. each, $3.50 per 12.

**POPLAR TREES**

best for Avenues, Shade and Lawns, at reduced prices.

**WHO EVER HEARD**

of a Poplar tree dying in transplanting? 20,000 trees to offer at low prices.
AMERICAN ELMS (FROM PHOTOGRAPH), THE MOST FAMOUS OF ALL AMERICAN TREES, OVERHANGING THE BANKS OF THE PICTURESQUE GENESEE RIVER, ROCHESTER, N. Y.

American Elm.—The most admired of all American trees. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets and highways than any other one variety. This is on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world. We have a large stock of these handsome and most beautiful trees.

Price of American Elm: First-class trees, 6 to 8 feet high, 35c. each; 8 to 10 feet high, 50c. each.

Camperdown Weeping Elm.—The cut herewith is a fine illustration of this remarkable ornamental tree. With age it often makes a tent-like play-ground for children beneath its umbrella-like branches. A tent could not better keep out the sun from this play-ground than could the Camperdown Elm. This is a rare tree, not often found on account of its expense, but it is highly prized by all who are lucky enough to possess it. Its vigorous, irregular branches, which have a uniform weeping habit, over-lap so regularly that a compact, roof-like head is formed, making it one of the most picturesque drooping trees. The foliage is very dense, making a perfect arbor. The finest weeping elm.

Price of Camperdown Weeping Elm: First-class trees, $1.00 to $1.50 each, according to size.
Ash Leaf Maple.—A very desirable tree for street planting; it stands transplanting well and grows rapidly. It is much used in the West and Northwest on account of its withstanding successfully both drought and intense cold. We have many of these at bargain prices, also the poplars.

Price of Ash Leaf Maple trees, 6 to 8 feet, 35c. each; 4 to 5 feet, 50c. each, $3.50 per 12.

White Flowering Horse Chestnut.—In early spring these trees are completely covered with beautiful flowers. We think there are but few who realize how beautiful are the flowers of the horse chestnut. When autumn comes, the large red nuts cover the ground to the delight of the children, who gather and make of them playthings. It is one of the old standbys as an ornamental tree.

Price of Horse Chestnut trees: 5 to 8 feet, 50c. each; 4 to 5 feet, 35c. each, $3.50 per 12.

Sugar or Rock Maple.—This native tree of ours is a universal favorite for street planting, and desirable everywhere. It is considered a slow grower, but is long lived. If planted in sod all trees or shrubs should be kept mulched for a year or two for best results.

Price, of Sugar or Rock Maple trees, 6 to 8 feet, 50c. each, $5.00 per 12; 8 to 10 feet, 75c. each.

Norway Maple.—This is one of the hardest ornamental shade trees, and one of the most beautiful. It makes more of a wide spreading tree than the sugar maple.

Price of Norway trees, 10 to 12 feet, selected, $1.00 each; 8 to 9 feet, 75c. each, 6 to 8 feet, 50c. each.

27 FLOWERING SHRUBS—
C. A. GREEN'S SELECTION.

Regular Catalogue Price, $3.50.
Our Special Price, $1.95.

To introduce our flowering shrubs to those who have never seen them we make this surprisingly low offer for the following varieties: 2 Old Homested Lilacs, 2 New Lilacs, 4 Deutzias, 4 Spiraeas, 2 Hydrangeas, 4 Weigelas, 2 Cranberries, 2 Ribbon Grass, 2 California Privet, 1 Ostrich Plant, 2 Live-Forever Rose Bushes.

GREEN’S CERTIFICATE, WORTH $1.00
If sent in with order on or before March 15th.
(WRITE YOUR NAME AND ADDRESS PLAINLY HERE.)

Name

Postoffice State

THIS CERTIFICATE (when accompanied by a cash payment for $1.00 worth or more of trees) entitles the holder to a credit of One Dollar on his purchase of trees, plants or vines, but the prices must be those printed in Green's Catalogue, and no plant, vine or tree, of Green's Home Garden Collection, premium or gift, must go with this offer.

This Certificate will not be accepted after March 15, 1906.

GREEN'S NURSERY CO.
Rochester, N. Y.
EUROPEAN WHITE BIRCH.

This attractive ornamental tree is suitable for decorating lawns, parks and drives; of graceful form, silvery bark, slender branches, and light and airy foliage, render them general favorites. As single specimens on the lawns, are very imposing and handsome. They thrive even in the poorest soils and in the most exposed situations. The bodies of these trees are white, like those of cut-leaved weeping birch. In planting trees on your home grounds you should order a few of these European Birch. Well branched, handsome and well-rooted trees.

Price of European White Birch, 8 to 10 foot trees, 35c. each, $3.50 per 12; 5 to 6 foot trees, 25c. each, $2.50 per 12.

The Cut-Leaved Weeping Birch. — This noble tree is not only the most popular of the weeping trees, but it is decidedly the best. Its tall, slender, yet vigorous growth, graceful, drooping branches, silvery white bark, and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree.

Price of Cut-Leaved Weeping Birch, 4 to 5 foot trees, $1.00 each.

HARDY FLOWERING SHRUBS.

COMMON SNOWBALL.

Snowball (Virburnum).—A well-known favorite shrub, with globular clusters of white flowers the latter part of May.

Price of Snowball, strong bushes, 20c. each, $2.00 per 12.

Weigelas, Attractive Flowering Shrubs.

Weigela Rosea.—This is one of the most charming shrubs in cultivation; it cannot be too highly recommended; the flowers are large and of a deep rosy color, and are borne in great profusion. We offer them in different colors, Rosea, red, pink and white.

Price of Weigelas, strong plants, 20c. each, $2.00 per 12.
Deutzia, Early White — The slender or graceful Deutzia is a native of Japan, from whence it was introduced by Dr. Siebold. Flowers pure white. In the open air it is the first of the Deutzias to flower, which it usually does about the middle of June. When young its growth is stiffly upright, but in time it will spread into a graceful little bush from 3 to 4 feet in height.

Deutzia, Pure Double White — A variety having double flowers, which are white, tinged with pink, and which are produced in racemes from 4 to 5 inches long in great profusion.

Deutzia, Pride of Rochester, is a variety raised and introduced by Ellwanger & Barry, and blooms a week earlier than the other varieties. The flowers are large, double white, slightly tinged on the back of the petals with rose.

Deutzia Rosca—Red flowering, very attractive and should be included in every collection.

Prices of all above varieties of Deutzias, 20c. each, $2.00 per 12.

Spiraea Billardi.—Rose color. Blooms nearly all summer.

Spiraea Callosa Alba—A white flowering variety of dwarf habit; very fine.

Spiraea Douglas,—Has spikes of beautiful deep rose-colored flowers in July and August.

Spiraea Callosa Rosea.—Has large panicles of deep rosy blossoms; grows freely and blooms nearly all summer; fine.

Spiraea Van Houttel.—This is undoubtedly the best of the spiraeas. The accompanying cut is a fair one, and shows it in blossom. The blossoms are white. Do not pass it by.

Price, strong bushes of above spiraea, 25c. each.

Spiraeas in assorted colors—White, Pink, Red, Double White and Rose.

Price of all varieties of Spiraeas—20 cts. each, $2.00 per 12.
LILACS. These are well-known, beautiful shrubs, indispensable in every collection. Special attention is called to the new, flowering varieties we are offering.

MADAME LEMOINE LILAC.

Madame Lemoine (Double White).—This fine double flowering variety is of a pure snow white color. Its flowers, which are composed of a number of corollas, are borne in enormous panicles, larger than other varieties.

Price—Strong, 3 to 4 feet, 35c. each, $3.50 per doz.

Old Homestead Lilac.—There are no flowering plants more highly prized than this beautiful pink lilac. The Old Homestead Lilac is not claimed to be a new variety. It is a choice variety found in an old garden at Green's Fruit Farm.

Price—25c. each for strong well rooted plant.

Lilac, Purple.—The well-known variety, one of the best. A good grower; flowers and young wood fragrant; purple.

Price—Large size plants, 25c.

Lilac, White.—A very desirable contrast to the purple; those who have one should have the other.

Price—Large size plants, 25c.

1000 NEW HARDY LILACS.

Comprising Twenty Named Varieties

In double and single blossoms. There are double and single white, double and single purple, double and single violet, pink and others of bluish tints. Order by colors, please. Strong 2-year flowering bushes.

Price of New Hardy Lilacs, 35c. each, $4.50 per doz.

OLD HOMESTEAD PINK LILAC.
Tree Cranberry.—This is an attractive and profitable fruit. Hardy as a rock and most desirable, combining the ornamental with the useful. Its beautiful red fruit clings to the branches in winter.

Price of Tree Cranberry—Large bushes, 20c. each, $2.00 per 12, medium, 15c. each, $1.50 per 12.

HARDY VINES.

Althea (Rose of Sharon, Tree Hollyhock).—The Althea is a flowering shrub and is represented in many colors, the prevailing colors being white and blush-purple. The Althea has been called by some the Tree Hollyhock, since its blossoms somewhat resemble those of the Hollyhock. When in full bloom the Althea is ablaze with blossoms. We have the Altheas in different colors, pink, purple, white, and pink and white.

Price of Althea, strong bushes, 25c. each.

Clematis Paniculata.—A remarkably beautiful climbing plant. Flowers pure white, star-shaped, about one inch in diameter, borne in large clusters, will last several days as cut flowers, retaining their freshness and fragrance. Plant is a strong, quick grower, has broad, healthy foliage, seldom attacked by insects. A strong blooming plant.

Price of Clematis Paniculata, 25c. each.

Clematis Jackmanni.—We consider this by far the best clematis—takes to transplanting better, blossoms more, is hardy and seems to be free from disease which attacks other varieties. The flowers, when fully expanded, are from 4 to 6 inches in diameter; intense violet purple, with a rich, velvety appearance, distinctly veined. It flowers continually from July until cut off by frosts.

Price of Clematis Jackmanni, strong plants, 35c. each.

Golden-Leafed Elder.—The best of all colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold.

Price of Golden-Leafed Elder—Strong plants, 25c. each, $2.50 per 12.

Forsythia Viridissima (Golden Bell).—From China. A fine, hardy shrub of spreading habits and straggling growth. It comes into bloom early, and flowers are of a bright orange-yellow.

Price of Forsythia—Large, 25c. each.

Purple-Leafed Barberry.—A beautiful shrub with violet-purple foliage; showy, small yellow flowers, and beautiful red berries in pendulous clusters.

Price of Purple-Leafed Barberry—Strong bushes, 20c. each, $2.00 per 12.

Mock Orange.—Flowers white, deliciously perfumed. Derives its name owing to flowers resembling orange blossoms; a delightful substitute for that noble flower.

Price of Mock Orange, 20c. each, $2.00 per 12.

White Fringe.—A popular and much admired shrub of moderate growth and rounded form, with large, dark green, glossy leaves, and long drooping panicles of beautiful white, fringe-like flowers, which are borne in great abundance throughout May and June, and present a most graceful appearance.

Price of White Fringe—Strong plants, 35c. each.

OSTRICH PLUME ORNAMENTAL GRASS.

Ostrich Plume grows as high as four feet, and a single plant may measure across its top three or four feet. Is easily transplanted and almost sure to grow.

Price of Ostrich Plume—Plants by mail or express, 10c. each, 75c. per 12.

Variegated or Striped Grass.—This is a grass we grow on account of its being so pretty. It pleases us well for borders of flower beds, walks or a row here and there to change the monotony of the garden or field.

Price of Striped Grass—Strong sets, 10c. each, 60c. doz., $4.00 per 100.
Hardy Hydrangea.—We urge our friends to plant the Hydrangea. There is nothing that will gratify you, who love beautiful objects, more than this. We advise you to plant it for the following reasons: It is perfectly hardy, enduring the severest winters out of doors without protection. It is easily transplanted, not one in a thousand dying; it never fails to blossom the first year planted; no matter how small the plant, it immediately buds out in great profusion of flowers, many of them as large as the head of a full grown child. It is thus attractive immediately after planting, gaining in beauty each year for ten or twenty years if properly pruned. It remains in blossom the longest of any flower, a single blossom remaining in beauty for nearly a month. We have plantations of these flowers that delight the beholder for a month at a time. When the specimens first open they are greenish white, later they turn to a pure white, and still later to a delicate pink hue. The Hydrangea should be cut back at least one-half of each season’s growth in order to get the largest specimens. If the branches of the bush are cut down nearly to the ground, it will not injure it, and the most beautiful specimens will be produced the same season. It can be grown in tree form to a single branch. To get the best results, make the soil very rich, but it will grow anywhere and on any kind of soil. There is no plant on earth that I can recommend with greater confidence than the Hydrangea. It can be mailed safely anywhere.—C. A. Green.

Price, by mail, postpaid, 25c. each; larger, by express or freight, 25c. each, $2.50 per 12; extra large, 50c. each, $3.50 per 12.

California Privet Hedge.—This photograph of a hedge of California Privet, with pear and apple trees and grape vines behind hedge, was taken by C. A. Green at Rochester, N. Y., and shows how beautiful is the California Privet as hedge plants. This hedge has been planted only a few years. It remains green at Rochester nearly all winter. It has a beautiful white blossom, something like a white lilac. It is not so rank a grower as the locust or the spruce, and does not spread so wide or occupy so much ground as many other hedges. Therefore it is popular in city and village planted on the streets or between small building lots.

This cut also gives an idea of what may be accomplished in the way of growing fruit trees and vines on a small lot. The lot photographed is not larger than 45 x 150 feet, and yet it contains six pear, five plum, four peach, two quince and two apple trees. Near the hedge will be noticed several grape vines which are objects of beauty, trained on a trellis. At the back end of the lot is a cultivated strip of ground, ten feet wide, the width of the lot.

Price of strong, well branched Privet plant, 8c. each, 75c. per 12, $4.00 per 100. $35.00 per 1000.

WE HAVE THOUSANDS OF FLOWERING SHRUBS, VINES AND ORNAMENTAL TREES.
If you do not find what you need in this catalogue, write us for prices. We can save you money on anything you might need.

53
ROSES. The Rose has always been a favorite among plant lovers, and time seems but to enhance its beauty and popularity.

A HANDSOME ROSE.

La France—Silvery rose, with pink shades and satin-like petals of unsurpassable beauty; large, symmetrical and deliciously fragrant; blooms from June until frost; hardy with protection. A universal favorite. One of the most constant bloomers, flowering continually all the summer in the open ground.

Prince Camille De Rohan.—Universally known as “The Black Rose,” owing to its very deep, velvety crimson color, passing to intense maroon, and shaded black; large, handsome and fragrant blooms.

Margaret Dickson.—White, with pale flesh center; petals very large, shell-shaped, fragrant, a fine variety; foliage very large, dark green. The finest white rose grown.

Prairie Queen (Climber).—Bright rose, very large and free bloomer; extra fine.

Baltimore Belle (Climber).—Pale blush, large, very double; one of the best climbers.

Mrs. John Laing.—A beauty in clear, bright, shining pink; each bud in its long, serrated calyx with adjacent green foliage, forms a dainty and lovely boutonniere; immense, full blooms on long, stiff stems; sweetly scented. A good grower, constant bloomer, and hardy.

ADDITIONAL VARIETIES.

John Keynes.—Red.
Madame Plantier.—White.
Red Moss and Salet Moss.

Price of all varieties of Roses on this page: Strong, well rooted, 2 year bushes, 25c. each, 12 for $2.50.

General Jacqueminot.—The leading rose. Deep, brilliant shaded crimson, with large petals, globular with high center. A well-known favorite; one of the best and planted by everyone who plants roses.

Magna Charta.—A general favorite, prized on account of its strong, upright growth and bright, healthy foliage, as well as for its magnificent bloom. The color is beautiful bright pink, suffused with carmine.
LIVE-FOREVER ROSE GROWN AS HEDGE.

THE LIVE-FOREVER ROSE. IT BLOOMS FIRST AND EVERY YEAR.

A bug-proof, hardy rose at 15 to 25 cents each. If you have tried growing roses and failed, try once more, for we have discovered a rose which lives long and is proof against insects and diseases. It is as easy to grow this variety as lilacs, corn or sunflowers.

I recommend this rose to all, especially to those who have not been able to succeed with roses. Plant it in large beds and you will have a display of bloom that will attract attention and admiration. Plant it in the form of a hedge-row and you will have something attractive and unique. You can train it low or high as you desire. Live-Forever Rose can be trained as a climbing or as a bedding rose, or it can be trained to a single stalk like a rose tree.

Price of Live-Forever Rose: Strong, well-rooted 2-year bushes, 20c. each, 12 for $2.00, 50 for $7.50.
Price of 1 year bushes, or mailing size, suitable for hedges, etc., 10c. each, $1.00 per 12, 50 for $4.00, 100 for $7.50.

Coquette des Alpes.—White, slightly shaded with carmine; strong grower and a great favorite. This variety is very valuable; it continues to give a profusion of blossoms for weeks after general varieties have finished.

Paul Neyron, on our grounds, gives us more blossoms than any other variety, except Coquette des Alpes. If we could only plant one rose bush, Paul Neyron would be our choice. The blossoms remind one of a cabbage in size. Bright rose color, globular, very showy; the largest rose in cultivation; a vigorous grower. These roses do not need petting. No plant thrives better than the rose, and no variety of rose is likely to please you better than Paul Neyron.

Crimson Rambler.—A climbing rose of unusual attractions. Very hardy, having withstood 10 degrees below zero without covering. Vigorous in growth, having grown 8 to 10 feet in a season. Produces a profusion of blossoms, having been known to produce 300 blossoms on one shoot. The Crimson Rambler is especially adapted for covering trellises.

Price of Coquette des Alpes, Paul Neyron and Crimson Rambler: Strong, well-rooted bushes, 25c. each, 12 for $2.50.
Norway Spruce Hedge.—The cut herewith shows a hedge of Norway Spruce in Mt. Hope Cemetery, with cut-leaf weeping birch trees in the background. There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed of great beauty at all seasons, particularly in winter when its branches are weighed down with snow.

The trees may be planted eighteen inches to two feet apart for hedges, but if planted three feet apart they will in time occupy all of the space. Norway Spruce is often used as a lawn fence between village or city lots. It can be planted most effectively in groups on the lawn, planting far enough apart to give each tree an opportunity to expand itself in its beauty. It is as often planted as single specimens, and planted in this way it has few superiors as an ornamental tree, growing to great size. There are many who do not realize the value of this grand evergreen for ornamental and practical purposes. Were its value known as it merits, there would not be enough in stock in all the nurseries in the United States to supply the demand. In all bleak places, where nothing else will grow, or in other situations where needed, plant Norway Spruce.

Price of Norway Spruce, 12 to 18 inches, 15c. each, $1.50 per 12, $10.00 per 100.

American Arbor Vitae (Yellow Cedar) is a favorite evergreen tree for hedges. Its growth is not so rampant as to be objectionable, and yet it soon assumes a condition of great beauty, attractive from the moment it is planted. The foliage is feathery and spray-like, becoming more dense after each pruning with shears. Set plants twelve to twenty inches apart, in a border wide enough to admit of cultivation on each side of the hedge, and see that sods do not encumber the ground at planting. The first three or four years all the pruning necessary will be to shear off the tops of each plant, making the hedge of an equal height. I know of no more beautiful hedge than the American Arbor Vitae. It forms a dense mass through which a cow or horse would not attempt to penetrate, and which shields the grounds from cold winds and driving snow. It is a thing of beauty, not only in the summer but in winter.

It is also beautiful as a single tree, made dense by clipping the shoots every year or two at the ends of the branches, but it forms a beautiful tree without any trimming whatever. It is often used in beds with shrubs and ornamental plants with good effect.

Price of first class trees, 2 to 3 feet, 25c each; $2.50 per 12; $18.00 per 100.

Hedge of American Arbor Vitae.

If we please you, tell others. If not, tell us.
Yucca Filamentosa.—I know of no flowering plant more showy than this. The plant itself looks something like the Century plant, and is mistaken by many for the Century plant. It is a gorgeous grower and endures the most severe winters without protection. It blossoms year after year, perhaps for a lifetime, as shown in the above illustration, and its blossoms look something like lily blossoms. They are pure white, and remain a long time in bloom. Sometimes the blossom stalk is thrown up to the height of 5 to 6 feet, making one of the most showy and conspicuous flowering plants in existence. The Yucca is a rare plant, is easily transplanted and should be in every selection.

Price of Yucca—Strong plants, 35c. each, $3.50 per 12.

Perennial Phlox.—Finest autumn flowers. Plant roots of the Phlox in fall or spring and those roots will continue to send up flower shoots each spring for twenty years. The bunch of roots, however, will after four or five years become so large as to be improved by dividing the cluster of roots, making, perhaps, a dozen transplants from one cluster, planting those out in a new bed, or a new row. Nothing transplants easier and there is no flower grown which can be produced in abundance with so little trouble. I plant the Phlox in a row along the border of the roadway, in a bed made up of several rows, or in a round bed on the lawn, or in single clumps here and there among the flower beds, or in the shrubbery. Every one who visits Mr. Green's place admires these beautiful plants of Phlox. The Phlox is hardy everywhere, and succeeds everywhere, and on all soils. We offer three colors: Pink, white and red.

Price of Phlox—Strong plants, 10c. each, $1.00 per 12.
Paeonies.—This old and popular flower has again come into great favor. It is certainly worthy of a revival in its favor, since it is one of the most showy and attractive of flowering plants. Of late years great improvement has been made in varieties of Paeonies. Almost all colors have been introduced, and many of the varieties have marked peculiarities, being as fragrant and beautiful as the rose.

Price of Paeonies—Red and pink, best varieties, strong roots, (that will flower the coming summer), 25c. each, $2.50 per 12. Price of White Paeonies, strong roots, 35c. each.

Dahlias are all the rage now. They are different from all other flowers and have been greatly admired since the days of our grandmothers. But varieties have been vastly improved and multiplied, so that if our grandmothers should rise from their graves they would scarcely recognize the modern Dahlia in all its beauty. Dahlias are easily grown. They must be treated like Cannas. We take up the roots every fall before freezing and place them in dry sand in ordinary cellar and have never had trouble in keeping them. Immediately when planted in spring they send up vigorous shoots which soon blossom freely. Dahlias may be planted in beds by themselves or may be mixed with other flowers. Usually strong growing plants should be placed in the back part of the bed with lower flowers in front. Dahlias make beautiful bouquets, and as they blossom in a bed are remarkably attractive.

Price of strong Dahlia roots, 15c. each, $1.50 per dozen.

Gladiolus Bulbs.—This is one of the best of the summer flowering bulbs. It is a flower anyone can grow, and is lovely enough to satisfy the most exacting.

Price of Gladiolus Bulbs—Fine mixed colors, 15c. per 6, 25c. per 12, $1.10 per 100.
GOLDEN GLOW.
Strong Plants, 5c. each, 50c. per 12.

Golden Glow.—This beautiful yellow blooming perennial plant was unknown to most people until a recent date. I know of no flowering plant that has attained such great popularity in so short a time. In order to be popular, a plant must be able to thrive in all localities without nursing and this is just what Golden Glow does. Like Phlox it stands out doors all winter. The foliage, which dies back every fall, springs up vigorously in the spring and grows to the height of 5 or 6 feet. If you do not wish the plants to grow so high, nip them off when they are a foot or two high, and they will branch out lower and be more desirable for certain localities. The blossoms appear in large numbers, hundreds of them on a single plant, and they succeed one another and remain long in bloom, giving the place an animated and brilliant appearance. Don't fail to plant Golden Glow.

Price of Golden Glow, strong plants, 5c. each, 50c. per dozen, by mail or express.

Ampelopsis Veitchii (Boston Ivy).—This is one of the most beautiful ivies, a rapid grower and clings tenaciously to brick or stone walls. A single vine may in time cover the entire side of a house or church. It is hardy and thrives almost everywhere.

Price of Ampelopsis Veitchii, strong vines, 35c. each.

GOLDEN GLOW PLANT IN FULL BLOOM.

Halleana (Hall's Japan Honeysuckle).—An almost evergreen honeysuckle of the greatest value, being hardy and of strong growth. The flowers are fragrant, of a pure white, changing to yellow, resembling a Cape Jasmine in odor, and produced in profusion from May to December. Price, strong plants, 20c. each.

BARGAIN LOT OF FLOWERING SHRUBS.
We Offer 27 Flowering Shrubs for $1.95. Regular Price is $5.50.

Our patrons sometimes ask our C. A. Green to select the most desirable shrubs, since they do not know which are the best. He has selected the list given below: 2 Old Homestead Lilacs, 2 New Lilacs, 4 Deutzias, 4 Spiraeas, 2 Hydrangeas, 4 Weigelas, 2 Cranberries, 2 Ribbon Grass, 2 California Privet, 1 Ostrich Plume Plant, 2 Live-Forever Rose bushes.

TRUMPET FLOWER—TRAINED TO STAKE IN TREE FORM.

Trumpet Vine.—The reader may be surprised to learn that the Trumpet Vine may be made to grow like a tree, and is very beautiful when grown in this way. Plant the Trumpet Vine in an open space on the lawn and train a single shoot to a strong stick.

Price of Trumpet Vine, strong plants, 20c. each, $2.00 per 12.
PLANTS AND TREES BY MAIL
POSTPAID AT PRICES ATTACHED

Perhaps you do not know that we send many thousand plants and trees safely by mail every winter and spring. THE FACT IS WE MAKE A SPECIALTY OF MAILING all varieties of small fruit plants as listed in this catalogue.

Apple Trees.—Especially for this season's mailing we have grown a grand block of one-year-old apple trees. Such trees that every buyer will be pleased with, and such varieties that no fruit grower interested in apples can afford to overlook. We offer the following varieties by mail: American Blush, Banana, York Imperial, Minkler, Gloria Mundi.

Price of 1 year Apple trees, 12c. each, $1.00 per 12.

Price of the new varieties of apples, 1 year mailing size trees, Green's Baldwin, Bismarck and Wismer's Dessert, 25c each, $2.50 per 12.

Gooseberries by Mail—(Chautauqua). The largest good yellow American variety.

Price, 15c. each, $1.50 per 12.

Downing—6c. each, 65c. per 12, $6.00 per 100.

Red Jacket—New, fine. 20c. each, $2.00 per 12.

Red Raspberries —(Cuthbert)—5c. each, 45c per 12, $1.85 per 100.

Loudon—6c. each, 60c. per 12, $3.25 per 100.

"I am glad I purchased the Red Raspberry plants from you a few years ago. I got 12c. a quart for them."—John C. Weber.

Black Raspberries—(Kansas, Conrath), 40c. per 12, postpaid.

For other Black Raspberries, see pages 36-38.

GRAPES.

We have a car-load of nice vines that can be sent by mail.

Charles A. Green Grape.—This hardy early white grape is equal to McPike in growth and hardiness of wood. The quality is much better than Concord and very sweet. Clusters are large and compact.

Price of strong vines, 15c. each.

Green's Unnamed New Strawberry (see page 42)—Pineapple flavor, large size, vigorous grower, great yielder.

Price, 50c per 12, $1.35 per 100.

The above is our leading variety for this season, but we can mail other varieties offered in this catalogue at same prices as offered by the dozen and at 100 price if 20c. be added.

Red Cross Currant is an exception to the ordinary rule, being the sweetest currant ever produced in the way of red currants. In calling attention to the characteristics of Red Cross, this qualification of sweetness and palatableness has not been properly emphasized. We have 50,000 strong 1-year mailing size plants now ready to send out.

Price of Red Cross Currant, 5c. each, 50c. per 12, $3.25 per 100, postpaid.

For 2-year-old bushes, and other varieties of currants, see special offers in this catalogue.

Asparagus—We send many thousands by mail—never knew of a root being spoiled on way to the buyer.

Everyone who has a garden should have an asparagus bed.

Palmetto and Conover's Collard, 25c. per 12, $1.00 per 100.

Rhubarb—10c. each, $1.00 per 12.

Horse Radish—Sets, 15c. each, 60c. per 100.

Sage—(Holt's mammoth)—Strong plants. 10c. each, $1.00 per 12.
PEACH TREES BY MAIL.

Not stunted trees, but first-class June budded, excellent in every way for long shipment and successful planting. We have mailed these in years past to valleys of the Western mountains, and other distant sections, where their success has led to the planting of thousands of acres of trees in regions where it was not known that peaches could be grown.

We offer one variety only of mailing size peach trees, Niagara.

Niagara Peach.—A new variety, but fully tested by extensive orchard planting near Rochester, N. Y. Ripening one week earlier than Elberta, remarkably free from yellows and leaf curl, and cannot be surpassed in healthfulness and vigor. It is of large size, beautiful, and better in quality than Elberta.

Price of Niagara Peach, mailing size trees, 15c. each, $1.50 per 12.

For Niagara and other peach trees for express and freight shipments see other pages in this catalogue.

FLOWERING SHRUBS.

By Mail, nice, well rooted Plants (ready March 1st).

Carolina and Lombardy Poplar, 1 year trees, 2 to 3 feet. These trees will grow rapidly and attain a surprising growth the first year; we have them showing ten feet of growth in one season. Price of Poplar, 25c. each.

Horse Chestnut trees, 1½ to 2 feet, 25c. each.

American Sweet Chestnut Seedling, 1½ to 2 feet, 15c. each, $1.50 per 12.

Gladiolus Bulbs.—This is one of the best of the summer flowering bulbs. It is a flower anyone can grow. By making successive plantings the flowering season may be continued much longer than by planting the bulbs all at the same time. There is no limit to the range of color — pink, scarlet, yellow, crimson, white and a host of other colors.

Gladiolus Bulbs, mixed colors. Price, 15c. per 6, 25c. per 12, $1.10 per 100.

CANADIAN PATRONS.

Please add to following prices to defray postage, which is double that of U. S., one cent for each plant, tree, bush, shrub, vine and bulb. Except strawberry plants, and raspberry and blackberry plants, add 5c. per dozen and 25c. per 100 to postage rates already given.

Six mailed at half the price of dozen and 50 at half the hundred price on all items offered by mail.

Do not take chances. Get tools and supplies from us. We use them and know they are right.
CLIMAX BASKETS FOR GRAPES AND PLUMS.

These baskets are used for shipping grapes, plums, etc.; also eggs for hatching.

Price of Climax basket, 4 lb., per 100, $2.75. 8 lb., per 100, $3.50; per 1000, $32.00.

Send orders early before fruit ripens.

SPLINT BASKETS FOR GRAPES AND PLUMS.

For marketing grapes, etc., in the near-by or home market. More of these baskets used than any other.

Price, of 4 lb., per 1000, $9.50; 500 for $5.00; 100 for $1.25. Send orders early.

Price, of 8 lb. Splint Baskets, per 1000, $21.00; per 500, $11.00; per 100, $2.50.

The Eight Pound Splint is the best basket for cherries, grapes, plums, etc., for home marketing.

BERRY BASKETS, QUART OR PINT.

Price, 500 for $2; 1,000 for $3.50.

These are the standard size regulated by law, made of the best material, wire sewed. The price will be higher as the season comes on. Order now, or you may not get them at any price. Order Baskets early.

STANDARD CRATES. 50c. each; $5.00 per dozen.

They are well made, of the best material, and are complete with hinges and patent latch. They hold 32 quart baskets of berries without crowding.

SPECIAL.—A Standard 32-quart crate with 100-quart or pint baskets, only 95c.

STANDARD PEACH BASKETS:

Our peach baskets hold eleven quarts; are well made of elm and used by all growers.

Price of peach baskets, 50 for $1.75; 100 for $3.00; 1,000 for $26.00.

All Baskets and Fruit Packages must be ordered before the season for picking to make sure of getting in time.

These prices subject to change.

THE NIAGARA FRUIT LADDER.

A ladder made from the best selected white basswood with tie rods at every other step. A model for strength, lightness and durability. It always stands and never rocks, no matter how uneven the ground may be.

Price 25 cents per foot. 6 ft., 8 ft. and 10 ft. always carried in stock.

We can SAVE MONEY FOR YOU on any supplies or tools for Fruit Growing or Poultry Raising. Write us about your needs, and let us quote you prices.

MOORE’S CELEBRATED BLUE STEEL PRUNING SAW

is the best saw on the market for orchard use. The narrow point gets close in between the branch and the body of the tree, while the smooth back prevents injuring the bark.

Price, not prepaid, $1.00.

Our Aim is to furnish our patrons with everything needed for planting, growing, harvesting and marketing fruit in the best possible way at smallest outlay of money.
THE LATEST IMPROVED SPRAY PUMPS.

We are in the very center of the district where spraying was begun, and is now being done in the most approved fashion. We know, therefore, the best Sprayers. Here are some of the most Practical Spray Pumps with all the latest improvements with nothing to get out of repair.

IMPROVED BRASS BARREL SPRAY PUMP.
FOR ORCHARD OR SMALL FRUITS.

The best Barrel Spray Pump on earth for the price. It is made by the largest pump makers in the United States. All parts coming in contact with spray solution are made of Solid Brass and are not affected by the materials used. The entire pump sets inside the barrel and all valves are submerged in the solution, therefore no priming to be done as with other pumps. It throws a uniform, constant and elastic spray. It is very powerful and easily operated. The patent agitator stirs the solution from the bottom.

Nothing to get out of order. Can be used for whitewashing.

Price. No. 5, complete, with 5 feet of three-ply discharge hose and nozzle, ready to use, weight 25 lbs., only $4.95 .50
Eight foot extension pipe for higher trees,
Price. No. 6, complete with two 5 foot lengths of three-ply discharge hose and two nozzles for spraying two rows at a time, ready for use. Weight 30 lbs., $5.95 .90
Eight foot extension pipe for higher trees (each),
For Dasher Agitator, if preferred, add $1.00 to the price of either pump.

Always use extension pipes—You get better results.

These very pumps are sold by some dealers at $10.00 and $12.00 each.

ALL STEEL BARREL CART.

For use with any of our Barrel or Bucket Pumps. Enables the user to carry a full barrel of water or spray solution, and to reach places that would be impossible with a team and wagon. It is also a valuable protection against fire, and for sprinkling. Being made entirely of steel, it will last a life time.

The best Barrel Cart made furnished with barrel or without.

Price, without barrel, $3.95
Barrel $2.00 extra. Complete with barrel, 5.95

BUCKET OR BARREL SPRAY PUMPS.

Two Pumps in one for trees or small fruits and potatoes. When used as a barrel pump the entire pump except the handle goes inside the barrel, all valves being submerged in the solution. A Brass Barrel Spray Pump with more real advantages than are contained in any other spray pump now on the market. It has all the advantages of the ordinary barrel pump and bucket pump combined, and is sold at a moderate price. The work is all done on the down stroke of the handle, and it can be operated with one-third the power required for any other old style bucket spray pump. It is no experiment. It has been thoroughly tested and is an excellent pump for practical use.

Price No. 24, complete, ready to use, with agitator, 5 feet of 3-ply hose and graduating Vermorel fine or coarse spray and solid stream nozzle, $3.45
With eight foot extension pipe for higher trees, 3.95

This pump is catalogued by some dealers at $6.00 and $6.50, and is made at the largest pump factory in the country.

Always use pipe extension—You get better results.

BRASS BUCKET PUMP.

An excellent pump for small fruit growers and poultrymen. Can be used for whitewashing, washing wagons, spraying potatoes and fruit trees. With the eight-foot extension pipe this pump can be used for spraying the larger trees. The pumping is all done with the downward stroke. A constant pressure of from 50 to 100 lbs., with very little effort, maintains a steady stream or continuous spray. The patent agitator stirs the solution from the bottom.

Price, with 5 feet of 3-ply hose, the best all around nozzle, ready to use, weight, 7 lbs. only, $2.85
The eight-foot extension pipe for spraying trees, 50c. extra.
Always order the 8-foot extension pipe; you get better results.

NOTICE.—We can send any of the sprayers on this page, or the knapsack Sprayer on the next page, DIRECT FROM THE FACTORY in Ohio if desired to SAVE EXPRESS CHARGES TO POINTS IN THE WEST.
KNAPSACK SPRAYER
For Small Fruit, Potatoes, Etc.

A Convenient Outfit with which to spray from four to six acres of small fruit or potatoes in a day.
The tank holds 5 gallons, and is fitted with lid and strainer, which can be removed.
The pump has a large air chamber, ball valves, solid plungers and agitator, and is also fitted with handle, so the operator can use it the same as our tank with bucket pump, viz., set the knapsack on the ground and work pump with handle.
The handle lever can be shifted from right to left shoulder, at will.

Price, No. 330, Knapsack Spray Pump, with 5 feet of ½-inch hose, pipe extension and Bordeaux or graduating Vermorel spray nozzle, which can be graduated from a fine mist spray to a solid stream or shut off entirely, $4.95.

THE AUTO SPRAY.

Eight to ten strokes of the plunger will compress enough air to discharge the entire contents and make a continuous spray for nine minutes. The “Auto Spray” has been improved by the addition of the “Auto Pop” shown in illustration. “Auto Pop” is an automatic valve which is opened by simply closing the hand, thus opening the valve and allowing an instantaneous discharge of spray. By releasing the lever it closes itself automatically, hence the spray is in perfect control.

Price, galvanized iron reservoir, $4.50; with Auto Pop, $5.50; solid copper reservoir, $6.00; with Auto Pop, $7.00.

Extension rods, 2 foot lengths, 35c. each.

SPECIAL INTRODUCTORY OFFER.—The Auto-Sprayer, one in a place, to introduce it:

Galvanized steel, with three extension pipes, stop-cock and nozzle, $4.95.
Solid brass, " " " " " " " " 6.45.
With Auto Pop Attachment, $1.00 extra.

COMPRESSED AIR SPRAYER AND WHITE WASHING MACHINE.

It is made of the very best grade of materials throughout. The top and bottom are double seamed and soldered; back seam is riveted, enabling them to stand a high pressure. The Tank holds four gallons and is fitted with a Safety Valve so as to prevent any danger of an explosion.
The air-pump is fastened securely to the outside of reservoir so that the spraying solution cannot get at the valves or other working parts. A brass tube connects the bottom of pump with reservoir and with each stroke of the pump the air is forced in close to the bottom thoroughly agitating the solution. These Sprayers are sold under a guarantee to be the strongest, most durable and complete Air-Sprayer and White Washing Machine on the market.

Price, No. 15 complete, ready to use, galvanized steel tank, $5.45.
Price, No. 16 " " " with copper tank, 7.45.

THE TENNENT HAND SPRAYER.

The newest and best Hand Sprayer on the market for house and garden use. The patent mixer, a valuable improvement over all other hand sprayers, stirs the solution thoroughly.

Price, with patent mixer, boxed for shipment, (weight, box and all, 6 lbs.), 95c.

Send your orders for Sprayers or Spray Materials to GREEN’S NURSERY CO., Rochester, N.Y.
GREEN'S FOUR ROW ATTACHMENT.

Can be attached to any barrel spray pump having two leads of hose, and used on any wagon as illustrated. This makes the best four row rig at small cost.

Price, complete with four vermorel nozzles, without pump, $9.35.

MEYER'S O. K. SPRAY PUMP.

Received the highest award World's Fair, St. Louis. Strongest, best all round pump for any hot or cold spray mixture, or whitewash. The handle is wrought steel with adjustable stroke, so as to enable the operator to get up a pressure of 200 lbs. or more if necessary. The O. K. can be attached to any barrel.

Price, complete, with agitator as illustrated, $9.95.

BORDEAUX MIXTURE.

(Standard Formulae, 1 gallon makes 50 gallons spray.) Ready for use by simply adding water. An indispensable fungicide, curing and preventing black rot, mildew, blight, rust, scab, and all fungoid diseases on fruits and plant.

Price. 1 gal. makes 50 gals. of spray solution, 5 gals. $1.00

KEROSENE EMULSION.

Prepared according to the most improved formula; ready for use by simply adding water (25 to 50 parts water to one of Emulsion). Price, per gal., $1.00; 5 gals., $4.50.

WHALE OIL SOAP SOLUTION.

For cabbage worm, scale on trees, caterpillars, melon louse, rose bugs, green fly and lice of all kinds, all sucking insects, either on plants or animals. Use from one to two pounds of the soap to 5 to 8 gallons of water. Be sure that the soap is thoroughly dissolved, and then apply in form of spray. Price of Whale Oil Soap, 1 lb., 15c.; 2 lbs., 25c.; 5 lbs., 50c.

WHITE HELLEBORE FOR CURRANT AND GOOSEBERRY WORMS.

Hellebore is often employed in cases where arsenical poisons would be objectionable. Use one ounce to three gallons of water. Price of Hellebore, 1 lb., 25c.; 5 lbs., $1.00.

SULPHO-TOBACCO SOAP KILLS CURRANT WORMS.

Excellent for rose bushes, shrubs, etc. It also acts as a valuable fertilizer, reviving plant life. For domestic purposes it rids the house of cockroaches and is a superior wash for dogs and all animals. Prevents poultry lice.

Price, 3 oz. Cake, sufficient for two gallons prepared solution, 10c.; mailed, postpaid, 13c.

8 oz. Cake, sufficient for five gallons prepared solution, 20c.; mailed, postpaid, 25c.

We are interested in supplying all our patrons with a good Sprayer, because it helps to care for the trees and plants they purchase.

Write us, telling how many trees you have to spray, the size, etc.; also the small fruit, potatoes or cabbage to be sprayed, and let us help you in the choice of a Sprayer, large or small, according to your actual needs. If you write us at once we can send you the latest and most reliable Spray Calendar, telling just what to use and just when to spray.

Address GREEN'S NURSERY CO., Supply Dept., ROCHESTER, N. Y.
GREEN’S IMPROVED APPLE PARES, CORERS AND SLICERS.

No. 1, for Home Use.—Pares, cores and slices the fruit, and then, pushing off apple and core separately, it is ready to repeat. This machine stands beyond the reach of all competitors. There is nothing about it to break or get out of order, while the wear is so slight as to make it almost everlasting. Can be used to pare without coring and slicing. Weight, packed, 3 lbs. Price, No. 1, complete, only 95c.

GREEN’S POTATO PARER.

Pares any shape or kind of potato better and quicker than can be done by hand; enters into and cleans out the eyes, and by taking a thinner paring saves 50 per cent. of the outside potato, which is ordinarily wasted. This machine is also suitable to quinces and pears. Weight, packed, 3 lbs. Price, 95c.

FRUIT EVAPORATORS.

We have a complete line of Fruit Dryers, Bleachers, Presses, etc. Write for prices on whatever you need in this line. Every fruit grower should have an outfit for evaporating fruit. It pays well.

SENSIBLE WINE AND CIDER PRESS.

A well-made and handsome Press for making cider, wines, jellies, lard, syrup, etc. Made with special reference to strength, and guaranteed against breakage under any fair usage. All iron and steel, stronger and better than the old wooden press. It has double curbs.

PRICE:

| Four quart curbs, weight 50 lbs. | $2.95 |
| Ten quart curbs, weight 40 lbs. | 3.95 |

Large Cider Mills and Presses for home or commercial use at very low prices. Send for special descriptive circulars.

GREEN’S BARREL HEADER

Should be on EVERY FARM. PRICE, with screw or lever, $1.00

GREEN’S HOME EVAPORATOR.

Thoroughly tested and approved. Latest, cheapest, best. Can be used on any stove, dries any fruit.

Price $6.00 Special Price, $4.75

READ THIS: To introduce our Home Evaporator and our No. 1 Parer, Corer, and Slicer (see description at top of page), we offer both for only $5.00. Weight less than thirty pounds; can go by express or freight at very small cost. Just think of it! A Parer, Corer and Slicer with a Fruit Evaporator, all for only $5.00.

YOU CANNOT AFFORD TO LOSE THIS OFFER.

Dear Sir—I found the Cook Stove Drier which I bought of you last fall just as represented and I think the world of it; it readily paid for itself last fall. I dried 400 pounds of dried apples with it and it did its work perfectly.

Yours respectfully,

CHARLES B. REES.

FRUIT, WINE AND JELLY PRESS

Three in one, Cleanest and best. The only one that separates juice, seeds and skins at one operation. For making wines, jellies and fruit butters from grapes, strawberies, raspberries, blackberries, gooseberries, currents, quinces, pineapples, etc. The dryness of the pulp may be regulated by thumb screw at the outlet. Weight only 15 lbs.

Special Price, complete, $3.00.

THE BEST BOOKS for the Fruit Grower, Gardener, Poultry man or general farmer. Each book is the work of a competent specialist, under the editorial supervision of Professor L. H. BAILEY, of the Cornell University, CHAS. A. GREEN and other practical men, and will be found readable, clear-cut, practical and thoroughly up to date, treating its topics in a plain but comprehensive way from the same general standpoint of combining science and practice. Planting, Gardening, Pruning, Spraying, Grafting, Budding, Picking, Packing, Marketing, Shipping, Dairy, Milk, Butter, Cheese, the Feed and Care of Animals, Poultry etc. Send for descriptive Catalogue and prices.

No. 41 PLANET JR. ORCHARD AND UNIVERSAL CULTIVATOR.

This is a new Orchard and Universal Cultivator, with patents pending, built to combine strength, lightness, adjustability and efficiency to the fullest extent in one tool, representing in itself all the advantages of our earlier patterns, with important improvements added.

Wheels. The steel wheels are low, entirely within the frame, and therefore do not catch and injure low limbs, etc. They do not change in width.

The Tongue is Steel, with either steel or wood evener and singletrees.

The Frame is high carbon steel, compact in form, well braced, heavy and strong.

Without the extensions, it cuts four feet in width, having seven stiff steel standards, carrying 2 1/4 x 10 inch teeth.

With the extensions, it cuts 6 feet 6 inches, carrying eleven teeth. The frame can be changed quickly to cut any width from six and a half down to four feet.

Packed weight, 450 lbs.

Price, with extensions, .................... $42.00
" without extensions, ...................... 32.00

A COMPLETE ILLUSTRATED CATALOGUE ON APPLICATION.
THE MATTHEWS NEW UNIVERSAL GARDEN TOOLS.

The Matthews Seed Drill, an efficient and durable instrument, has obtained such pre-eminence over the former styles that it has been generally copied by other manufacturers of Seed Drills.

MATTHEWS NEW UNIVERSAL CONSTELLATION SEEDER, HOE, CULTIVATOR, PLOW, RAKE AND MARKER.

This illustration shows the complete implement with all attachments furnished.

In the Constellation is presented a brilliant assemblage of the New Universal Garden Drill, and the New Universal Wheel Hoe, Cultivator, Rake and Plow, for use either as a One Wheel or Two Wheel Seeder, Hoe, Rake, Cultivator, Plow or Marker. Six implements in one.

Each implement is entirely separate from the other and the only parts used in each, the wheels and handles, are changed from one frame to the other by only two bolts.

Cultivating Attachments are shown detached. They consist of 1 Cultivator Frame, 1 Pair Hoes, 1 Pair Plows, 1 Pair Rakes, 1 Pair Narrow Cultivator Teeth, 1 Pair Wide Cultivator Teeth, 1 Center Cultivator Tooth, 1 Pair Markers.

Price, boxed, complete, $8.00

NEW GARDEN DRILL.

THE PERFECT DRILL.

So acknowledged by all the leading seedsmen and market gardeners.

The Manual "Cut-off," worked from the handles, instantaneously stops the flow of seed, and there is no seed wasted turning at end of rows.

Price, $6.25.

HILL AND DRILL SEEDER.

A complete hill and drill seeder. Drops seed in hill 4 to 48 inches apart, or in continuous drill.

Price, complete with right and left markers, $7.00

NEW UNIVERSAL DOUBLE WHEEL HOE, CULTIVATOR, PLOW AND RAKE.

The Special Design of a Double Wheel Hoe is the working of both sides of the row, at one passing, by what is termed "straddling row cultivation," but it may also be used as a between-row cultivator. In our implements all the good points of older efforts are retained, and in addition, new features are offered, which cannot fail of appreciation.

The Adjustable Arch not only forms a means for gauging the depth of work to be performed; but, by an ingenious device enables the teeth to be pitched at any angle desired. This is especially advantageous for the Hoe Attachments, which are by far the most used of all.

The Attachments are:
1 Pair Hoes, 1 Pair Narrow Cultivators, 1 Pair Plows, 1 Pair Wide Cultivators, 1 Pair Rakes, 1 Pair Vine Guards.

Price, boxed, complete, $5.00

NEW UNIVERSAL SINGLE WHEEL HOE, CULTIVATOR, PLOW AND RAKE.

The Adjustments, five in number, for graduating the depth of cultivation, are unique and readily accomplished. Price, boxed, $4.50.

GREEN'S POULTRY DEPARTMENT.

Cockerels, Pullets, and Eggs for Hatching for Sale.

Why Not Have Birds on Your Place from Chas. A. Green's Home? We Offer for Sale Four Breeds, as follows: White Plymouth Rocks, Barred Plymouth Rocks, Single Comb Brown Leghorns, and White Wyandottes.

BARRED PLYMOUTH ROCKS.—This breed is as solid as its name, and is often called the "Farmer's Friend," the "Old Reliable." It is the bird for business, and deemed by many the best fowl for farm and home raising. It is not only a good layer, but is quick to develop for the early market. As a fancied farmer once said to us, "When you kill one you've got something." ¹

WHITE PLYMOUTH ROCKS.—These are similar to Barred Plymouth Rocks, except they are all white, therefore above description will do for White Rocks. Note that prices are the same for all of our breeds. See prices of birds and eggs below.

PRICES OF BIRDS OF ALL BREEDS.—Cockerels, $2.00, $3.00 and $5.00 each. Pullets, $2.00, $2.50 and $3.00 each. Trios, $5.00, $8.00 and $10.00. We ship no cull birds. The lowest priced birds offered are standard bred, practically as good for breeding purposes as the higher priced birds. The $5.00 birds offered are the pick from the flock, containing the largest percentage of standard points and therefore commanding a higher price, since it makes them eligible for show purposes.

PRICE OF EGGS FOR HATCHING OF ALL BREEDS.—From good breeding pens, $1.00 per 13; from our best breeding pens, $2.00 per 13. While we do not guarantee the fertility of our eggs we are willing to offer to replace all settings from which the purchasers receive less than six chicks, at half the price paid.

GREEN'S AMERICAN POULTRY KEEPING is a practical treatise on Hatching, Diseases, Feeding and Care of Poultry, and plans for buildings. How to Market Poultry and Eggs for Profit. By mail, postpaid, 25 cents.

PRIZE BIRDS.—We have repeatedly taken prizes for our poultry at the large Rochester, N. Y., poultry shows. Breeders of fancy poultry come to our place to buy birds to breed from. Lower prices than ours mean poorer birds, dear at any price.

POULTRY PRIZES TAKEN BY BIRDS FROM OUR BREEDING PENS.

In the year 1900 a Leghorn Cockerel, from which most of our stock was bred, took first prize at the Chicago Poultry Show. At Rochester Show, January 9th, 1900, entered three birds, took one prize for White Wyandotte Cockerel. Rochester, N. Y. , show, January, 1901, won two Wyandotte prizes for cockerel and hen. At same show entered three S. C. B. Leghorns, won prize on hen; Rochester, N. Y., 1903, entered five S. C. B. Leghorns and won first, second and third prizes for cockerel, and fourth prize for hen; at Rochester, N. Y., January, 1904, entered S. C. B. Leghorn, won prize for cockerel. You can trust C. A. Green to send you big value for your money.

¹ This reference to the "Farmer's Friend" and "Old Reliable" highlights the practical aspects of these breeds, with a nod to their suitability for both business and homestead purposes. The mention of the Barred Plymouth Rocks stresses their solid and reliable nature, ideal for farm settings. The White Plymouth Rocks are described as similar but different, likely indicating their white coloration and potential for being a bit more refined than their barred counterparts. The pricing strategy is explained, aiming at both practical use and show purposes, with different prices for high-quality and standard stock. The inclusion of prize-winning records underscores the quality and reputation of Green's poultry department, suggesting a track record of success in the poultry industry.
OUR C. A. Green is delighted with the fruit of the Russian Mulberry. Though the above picture was made from a photograph, the artist has not shown one-tenth part of the number of mulberries to be found upon one of these trees. The number is simply incredible. I do not doubt that a large tree may produce a barrel of mulberries. These berries ripen through a long season and are very desirable for poultry or wild birds. They are also ravenously eaten at my Rochester place by people passing along the highway who clamber over the fence and break down the branches to get at this fruit. I particularly recommend the Russian mulberry for poultry keepers since the trees are perfectly hardy, free from insects, and bear large quantities of berries which are continually dropping and being eaten by the chickens. It is healthful for fowls. They can be planted in the poultry yard or adjacent to it. No matter where planted the poultry will find the tree and enjoy the fruit. Russian mulberry is a rapid grower and makes a handsome shade tree. It was introduced by the Russian Mennonites. It is the only mulberry which is perfectly hardy. Prof. John Craig, of Cornell University, heartily recommends the Russian mulberry on account of its hardiness, productiveness and the desirability of its fruit for birds and fowls. It is certainly a marvelous tree. Notice low price for trees.
